

Americans Asked To Help Ban Nuclear War Terror

Union Leaders Give Views In Railway Dispute

WASHINGTON (AP)—The Firemen's Union urged rejection today of President Kennedy's proposal for handling the dispute over job-cutting work rules on the railroads.

It recommended instead a resumption of collective bargaining "under congressional direction and observation"—a proposal put forth Friday by AFL-CIO President George Meany.

H.E. Gilbert, president of the Brotherhood of Locomotive Firemen and Enginemen, told the Senate Commerce Committee that "sufficient progress has been evident" in collective bargaining to warrant continuation of negotiations.

Kennedy, seeking to avert a nationwide rail strike, has proposed that the Interstate Commerce Commission handle the work rules dispute, with power to decide on rules for two years unless the parties agree earlier.

But Gilbert, like representatives of the Engineers' Brotherhood Friday, contended that referring the dispute to the ICC would amount to compulsory arbitration.

Gilbert testified at an unusual Saturday session of the Commerce Committee after Secretary of Labor W. Willard Wirtz held conferences in his office Friday night with both sides of the dispute in another stab at working out an agreement.

Wirtz, on hand to listen to Gilbert's testimony, told a reporter that the negotiating efforts would be resumed after today's committee hearing ends.

But he said Friday night there is "no basis for thinking at this point that the dispute can be settled outside legislation."

Rockefeller Still Strong Prospect, Romney Declares

LANSING (AP) — Gov. George Romney said Friday that New York Gov. Nelson Rockefeller's stature as a potential 1964 Republican presidential candidate was not deflated at the recent governors' conference in Miami.

Romney, who has been mentioned as a possible candidate himself, said Rockefeller set out to identify the Republican Party with a strong civil rights stand.

"I think he was largely successful at the conference to continue as a strong prospective candidate," Romney said.

Romney said Rockefeller could certainly feel that he had accomplished a great deal at the conference in the field of civil rights.

Death Toll May Reach 2,000 In Yugoslav Quake

SKOPJE, Yugoslavia (AP) — Debris of this quake-ravaged city slowly yielded the dead today from the worst natural disaster in Yugoslavia's history.

The government announced 600 bodies had been recovered.

Red Cross authorities estimated the toll may reach 2,000. One city official expressed fear 6,000 were dead.

More than 2,000 injured were treated at field hospitals in and around the ruins of Skopje, which was a Macedonian metropolis of 270,000 people and a tourist center when the killer quake struck before dawn Friday.

Tito Visits Scene
President Tito flew in for a personal assessment of the destruction wrought by the quake in this glittering, bustling showplace of his kind of communism. He had proclaimed a weekend of mourning.

His face set and grim, Tito joined thousands of rescue workers in sifting rubble for victims, some killed outright by falling masonry and others buried alive.

Yugoslavian army bulldozers and other earth-moving equipment were used in the quest for victims.

The city's two biggest hotels, the Macedonia and the Skopje, were destroyed. Officials said 260 tourists died in the hotel Macedonia alone.

Brigitte Jouffret, a 23-year-old student from Marseilles, was found alive in the wreckage of the Hotel Macedonia today. She survived by sandwiching herself between two mattresses.

Many Tourists Trapped
This is the height of the tourist season in Eastern Europe and many foreigners were in Skopje.

The quake—the worst natural disaster in modern Yugoslav history—destroyed about 85 per cent of the buildings in Skopje, northern Macedonian capital, and left at least half of the population of 270,000 homeless.

It was hard to estimate the total number of injured. Officials said more than 2,000 persons were treated at emergency stations.

Authorities rushed in an emergency force of 10,000, mostly soldiers, fearing an outbreak of fires from broken gas mains.

Residents were warned against drinking water that may have been polluted. In one section, residents mobbed an army truck bringing in water.

The army set up canteens to feed the survivors.

Children were lodged in resort hotels taken over by the government.

Survivors Dazed
President Tito, who decreed Friday and today as days of national mourning, was expected to arrive today. Premier Petar Stambolic arrived five hours after the earthquake and promised all possible aid to the survivors.

Survivors, many dazed and others weeping, spent the night in army tents or huddled under blankets.

Some gathered around bonfires, afraid to seek shelter in the few remaining buildings. By dawn, more than 90 young tremors were recorded in the area.

An eerie silence hung over the city, broken only by cries and moans. Men, women and children wandered aimlessly, clutching what few possessions they had saved.

Many wore pajamas. They fled from their beds in panic when the earthquake struck.

A mother sat beside a pile of rubble clutching the crushed bodies of her two children.

Treaty Is Step Toward Peace, President Says

WASHINGTON (AP) — President Kennedy has urged all Americans to join in a historic debate over the nuclear test ban agreement which he called "an important first step" away from a war that could take more than 300 million lives in an hour.

Kennedy, speaking Friday night on radio and television to gather support for the treaty, said: "It is my hope that all of you will take part" in the debate "for this treaty is for all of us."

"It is particularly for our children and grandchildren, and they have no lobby here in Washington," said the President.

"This debate will involve military, scientific and political experts, but it must not be left to them alone. The right and the responsibility are yours."

"The historic and constructive debate" for which the President asked will center around the Senate, which must ratify the agreement by a two-thirds vote.

Outlook Not Bright
The President did not picture a bright road ahead. He was cautious and grave.

He cautioned that the American, Soviet and British agreement to ban all nuclear tests except under ground is not millennium. It will not, he said, resolve all conflicts, turn the Communists away from their ambitions or eliminate the dangers of war.

But he called it "a shaft of light" cutting into what had been the darkening prospects of mass destruction on earth—"an important first step—a step toward peace—a step toward reason—a step away from war."

And the President warned that a nuclear war "would not be like any war in history."

"A full-scale nuclear exchange, lasting less than 60 minutes, could wipe out more than 300 million Americans, Europeans and Russians as well as untold numbers elsewhere," said Kennedy. "And the survivors, as Chairman Khrushchev warned the Communist Chinese, 'would envy the dead.'"

Agree On 3 Issues
After his speech, the President flew to his summer place at Hyannis Port, Mass., where today he will receive a report on the Moscow talks from Undersecretary of State W. Averell Harriman, the chief U.S. representative at the negotiations.

Secretary of State Dean Rusk, scheduled to fly to the Soviet Union next week to sign the treaty, will be on hand.

While Kennedy went on the air to tell Americans how he feels about the treaty and future agreements which may follow, Khrushchev did essentially the same in an interview with the newspapers Pravda and Izvestia.

The leaders were in agreement on three issues. Both hailed the pact's international significance; both hinted that it may open the door to other agreements, and both cautioned that no one should expect miracles.

Kennedy acknowledged that the treaty is not foolproof, because there is no sure way of controlling nuclear blasts deep in outer space, and because the "escape clause" permits signatories to withdraw.

But he said: "While it may be theoretically possible to demonstrate the risks inherent in any treaty, and such risks in this treaty are small, the far greater risk to our security are the risks

Junta Rule To End For South Korea
SEOUL, Korea (AP) — Gen. Chung Hee Park said today the military junta that has ruled South Korea for the last two years would step down in December, after presidential and legislative elections in the fall.

The strongman ruler did not reveal his personal plans. He is expected to run for the presidency.

Park set the presidential election for Oct. 11-20 and the national assembly election for Nov. 21-30.

Soviets Become More Friendly Toward West

MOSCOW (AP) — Nuclear test ban negotiators W. Averell Harriman of the United States and Lord Hailsham of Britain fly home today amid indications that the Soviets may be becoming more friendly toward the West.

Westerners who have contacts with Soviets say day-to-day relations during the test ban conference became considerably warmer when it was apparent that the Kremlin wanted the negotiations to be successful.

Several Western diplomats said they were invited to the homes of Soviet officials, something that almost never happens.

But some Western diplomats have warned that Premier Khrushchev may be hiding a few tricks, especially in his proposed nonaggression pact.

They argued that Khrushchev could make effective use of the pact if—and when—he decides to give Communist East Germany power over the Western supply routes to West Berlin.

Harriman and Hailsham will report to President Kennedy and Prime Minister Harold Macmillan on what they believe Khrushchev is thinking. They got the final items for their reports at a dinner given for them Friday night by Khrushchev.

Neither Harriman, undersecretary of state for political affairs, nor Hailsham, British minister for science, would reveal what Khrushchev told them.

New Sky Station Rides With Earth, 2,000 Miles High

CAPE CANAVERAL, Fla. (AP) —The Syncom 2 space communications station, riding high more than 2,000 miles above the earth, drifted slowly today toward its goal as the world's first satellite to operate over one area of the globe.

At its present rate of speed, about 6,800 miles an hour, Syncom 2 will reach a point over the equator above northern Brazil next Saturday. Scientists plan to stop it there by sending radio signals to fire nitrogen jets which will adjust the satellite speed and angle.

Music Beamed Back
If all goes well, the satellite's speed will increase to about 6,830 miles an hour and thus will be synchronous with the speed of the earth rotating below.

The earth at the equator travels 1,040 miles an hour, but Syncom 2 will be like a runner on an outside track who has to move faster to keep pace.

The above-Brazil point was selected as the best for communications experiments planned between the Syncom ground stations at Lakehurst, N.J., and on the ship Kingsport, anchored at Lagos, Nigeria, on the coast of West Africa.

Early communications tests were rated highly successful by the National Aeronautics and Space Administration. The Kingsport beamed the music of "The Star Spangled Banner," voice tapes and Teletype messages to the drum-shaped package. The satellite sent them back "loud and clear."

In Range By Monday
Officials cautioned that true tests lie ahead when Syncom 2 will be in position for two-way transmission between Africa and the United States via the two

stations. They predicted the satellite will be within radio range of both by Monday.

Project Director Alton Jones said major goals are to put the satellite in a synchronous orbit, stabilize it and then establish contact for a long period between Lakehurst and the Kingsport.

Because a satellite at Syncom 2's altitude would be within radio range of more than one-third of the earth's surface, only three such craft would be needed for continuous worldwide communications coverage. They would seemingly stand still in space at evenly spaced points about 22,300 miles above the equator.

The lower-altitude Telstar and Relay-type communications systems would require 40 or 50 satellites and far more extensive ground facilities.

Because of its small size, Syncom 2 will be restricted to radio, telephone, teletype and photo facsimile tests.

The space agency plans a larger Syncom, the first of which could be in the sky in 1965, to beam television and other communications.

A Delta rocket started Syncom 2 on its complex journey Friday.

Islanders Aided By Traverse City

DETROIT (AP) — A three-quarter ton package of clothes, needles, tools and clothing material was loaded on a Dutch freighter Friday, headed for Pitcairn Island in the Pacific.

The package, donated by Traverse City, Mich., residents, will be used to help the 110 residents of the island, who are all descendants of the mutineers of the HMS Bounty.

A broadcast executive, Les Biederman, is the man behind the donation. It all started when Biederman was in high school and doing research for an assignment.

He ran across the story of the Bounty and Pitcairn Island, and started a correspondence that has lasted over the years.

Biederman, president and founder of the Midwest Broadcast Co., kept asking if there was anything he could send to help the islanders. The replies carried only invitations to visit the island.

However, some months ago, Biederman got a reply asking for shirts and pants, or cloth. So Biederman started a collection that includes \$600 in cash besides the requested items.

It was all loaded aboard the Dutch freighter Prins Casimir. The captain, Frank Bodderj, said the cargo will be transferred to a British vessel in London and shipped from there to Pitcairn Island.

Biederman said Traverse City residents are planning a scholarship fund for island youths. They hope to establish a nursing scholarship for a Pitcairn girl, and an agricultural scholarship for a boy.

Test Ban Pact Gets Approval In Soviet Bloc
MOSCOW (AP) — Soviet bloc leaders approve of the partial nuclear test ban treaty initiated by the Soviet Union, the United States and Britain, says the Soviet news agency Tass.

Tass said the leaders registered approval after a briefing Friday by Soviet Foreign Minister Andrei Gromyko.

The leaders concluded three days of economic talks, Tass said. The economic discussions were not made public.

Cool Air Moves In From Canada

By The Associated Press
A massive cold front pushing south from Canada eased sultry temperatures from the Rockies to the Central Plains today.

The cold front was accompanied by widespread thundershowers that dropped up to an inch of rain in several areas from northern Colorado to Minnesota.

The temperature dropped considerably in some places as the cooler air moved in. Readings were as much as 20 degrees cooler. At Chadron, Neb., it was 61 compared with a 89 recorded 24 hours earlier.

Elsewhere, mostly dry weather prevailed with skies clear to partly cloudy.

In the East, shower activity was confined to a few isolated Kentucky and Tennessee. A few scattered thundershowers also fell over southern New Mexico.

Dangerous Rocket Dropped By Plane Hunted By Police
SALISBURY, Md. (AP)—Navy ordnance teams and state troopers resumed a search today for a dangerous rocket dropped accidentally from a military plane.

The 5-foot-long rocket containing 56 pounds of explosives was believed to be somewhere in a thickly wooded tract comprising 150 acres near Kingston on the lower eastern shore.

The rocket was dropped when controls malfunctioned on a Sky-raider airplane shortly after it took off from the carrier Forrestal off the Virginia capes Thursday.

Negroes Gain Unity, Says Widow Of Slain Leader
DETROIT (AP) — Mrs. Medgar Evers, widow of the slain Mississippi integrationist, says her husband's death was not in vain.

Mississippi's Negroes have derived from it a "unity and strength" which they never had before, Mrs. Evers said Friday.

Weather

Data by Weather Bureau, Escanaba and Associated Press

UPPER MICHIGAN: Mostly cloudy with scattered thundershowers tonight and over east portion Sunday; lows tonight 60 to 67; turning cooler Sunday with highs mostly in the 70's.

OUTLOOK FOR MONDAY: Mostly fair and pleasantly cool. ESCANABA AND VICINITY: Considerable cloudiness with chance of showers or thundershowers tonight, ending Sunday; low tonight around 66; cooler Sunday with high near 76. Southerly winds 10 to 20 mph tonight, shifting to west to northwest Sunday.

School Project Floor Is Poured

Floors for the new Escanaba Area school for retarded children were to be poured today in the Project Pride construction of the new building on the Webster School campus.

Next step in construction of the school building will be erection of the masonry walls. They will be of concrete block and brick veneer.

Project Pride, Inc., leaders dining Thursday noon at Marco's reviewed plans for the project and reported that entrances and windows would be delivered in the next two weeks and that electric, plumbing and heating services have all been roughed into the foundation structure.

Project Pride's directors reported to President Albert Valind of the Delta County Chapter, Michigan Association for Retarded Children, that with pouring of the 3,000 square feet of flooring today the construction passes a major mark and that public visitation can be encouraged to see progress of the work and encourage contributions of money and materials to the volunteer project.

Attending the progress review meeting were Walter Arntzen, Erling Arntzen, R. G. Beck, Mel Oslund, Al Brandt, Don Brandt, John Lemmer, Harry Needham, James Degnan, Claude Bohn, Hubert Boudreau, and Charles Neumeier.

In this mixed stand of aspens, bigtooth aspens with their yellowish bark and larger leaves are pictured on the left and quaking aspens, with their trembling, smaller leaves and light, luminous bark are pictured on the right. Quaking aspens under some conditions are so light colored that they are mistaken by casual viewers for birches. (Daily Press Photo by Bernard Schultz)

U.P. Youth Makes Bicycle Jaunt Of 1,300 Miles

MARQUETTE — Jon Magnuson, 18, has returned here after a 25-day bicycle trip of 1,300 miles, traveling alone on the circle route around Lake Superior.

Magnuson, the son of the Rev. J. Otto Magnuson, pastor of Messiah Lutheran Church, left Marquette the end of June. He rode east to Sault Ste. Marie, northwest to Nipigon, Ont., southwest to Port Arthur and Fort Williams, Ont., and Duluth, Minn., and then east to Ironwood, Champion and Marquette.

A 1963 graduate of Marquette high school, he plans to enroll at Northern Michigan university here this fall. He said he chose to make the trip alone so that he could "think about my future." He said it was a "fabulous trip, giving me an opportunity to meet many interesting and friendly people."

Aspens And Deer Interact In Michigan's Woodlands

By JEAN WORTH

Aspen trees have had a profound effect upon the deer of the Upper Peninsula and so have the deer upon the aspen forests.

This a finding of "Aspens, Phoenix Trees of the Great Lakes Region," by Samuel A. Graham, professor emeritus of economic zoology at the University of Michigan, Robert P. Harrison, Jr., and Casey E. Westell, Jr., (272 pages, \$7.50, University of Michigan Press).

Everyone in the Upper Peninsula is familiar with the aspens. They cover thousands of acres of forest lands and have become a major element of the area's industrial forestry.

They are also a major element in making deer plentiful. Dr. Graham and his co-authors in their chapter "Aspens and Deer" give a scholarly report on the interactions of aspen and deer which should interest all hunters and conservationists.

When deer are overabundant, states "Aspens," they can completely destroy all aspen reproduction following a logging operation, whereas when their numbers are moderate they may exercise a beneficial influence by

thinning overdense sucker stands.

Preferred Foods

"Aspen suckers (new young trees from roots of cut trees) are a much needed source of food for deer, and when the herd is moderate size there need be no ill effects on the development of good aspen forests," says the book. "Aspens, although they provide a staple food for deer, are by no means their most highly preferred food. Almost every endemic of the species may grow with aspens and most of them are browsed by deer.

"White cedar, yellow birch and basswood were the species that seemed to be most palatable. Red maple and black cherry were most frequently observed growing in mixture with aspen and our observations indicate that both are more palatable than aspens even though the data on browsing do not so indicate.

"We observed heavily browsed red (soft) maple growing adjacent to unbrowsed aspen suckers. We conclude that the effects of deer on an aspen stand will be reduced if other more palatable low-growing trees or shrubs are available to the animals."

Feed on Ferns

The researchers found that deer in some areas had exterminated New Jersey tea, a shrub normally associated with aspens, by overbrowsing and that other shrubs commonly associated with aspens which have suffered from deer browsing include Juneberry and Hawthorn. In contrast dwarf cherry was untouched and shrubby willows not much browsed, so it appears that deer browsing can eliminate their favored shrubs in a locality and increase their pressure on the aspen suckers.

Both bracken and sweet fern are generally distributed over the aspen lands of Michigan and although neither is regarded as an important food for deer, Aspens' authors found that both were fed

on during all seasons of the year. In some places browsing was so heavy that sweet fern was almost dead of damage.

"Very little is known about the preferences of deer for herbaceous species, but we know that deer do feed upon herbaceous plants, especially the broad leaved kinds. (Frequently percentages of herbs in aspen stands in Lower Michigan include the following in descending scale: bracken fern, wintergreen, bunch grass, sod grass, wild strawberry, violet, goldenrod, aster, dwarf solomon seal, dogbane, sedge, hawkweed, bunchberry, clubmoss, false solomon's seal, mint, chickweed, red clover, milkweed, bedstraw, horsetail, field sorrel, shield fern, touch-me-not, bindweed, etc.

Too Many Deer

"The effects on woody plants show that an excessive number of deer exert a profound effect on the composition of low-growing plants, eliminating some and permitting the unpalatable ones to occupy greater areas. We may conclude that, although a deer appears to nip a leaf here and a twig there while feeding, it nips much more of some things than of others.

"Much more information than we now possess is needed before we can say definitely how much browsing an aspen sucker can endure without being killed or hopelessly deformed, but the forester's concern is whether a stand as a whole will grow beyond reach of the deer in 3 to 5 years.

This can be determined at a glance. If the stand is not increasing in height at that rate, there are too many deer to permit normal development and the herd should be reduced.

"Little aspen grows in absolutely pure stands. In most aspen stands logged between 1951 and 1953 from 30 to 70 red maples, cherries, birches or oaks per acre were cut along with the aspens. These sprouted prolifically and the deer browsed upon them avidly.

"One might expect that browsing would result in forking and branching of the main stem of aspen suckers, as happens with red maple and some other hardwoods. But aspens recover almost immediately from browsing without these bad effects. When a sucker is nipped off, the first bud below the break almost always sends up a single shoot to take the lead. During the summer this new growth starts within a week after the stem has been nipped. However, browsing does stimulate more lateral branching than would occur if the suckers had not been injured.

Like Logged Areas

"Deer tend to concentrate in areas that have recently been logged. There desirable food is abundant and in such places the concentration of animals in a relatively small area can cause more severe injury to a sucker stand than would be expected from an evenly distributed herd. Thus the local pattern of deer distribution becomes an important consideration. One of the chief factors that determine this pattern is the presence and arrangement of suitable shelter.

"Except when their movements are hampered by deep snow, deer can find food in one place and shelter in another.

"The requirements of deer for shelter in the summer months are chiefly for concealment. In winter, however, they need protection from the bleak winds and severe cold. Most deciduous tree

growths fail to provide either requirement after the leaves have fallen and the animals seek protection in coniferous cover, movement called "yarding."

Conifers Attract

"Even in the summer the presence of coniferous cover is attractive to deer and the influence of proximity of coniferous shelter on the incidence of browsing on aspen suckers is evidence. When snow is deep such shelter, with the presence of a nearby food supply, may be their undoing.

"Deer tend to avoid areas that are completely cleared of tree growth. Fewer than a third of all the cuttings with no residual trees were browsed appreciably by deer, whereas almost half of those with residual tree cover after logging were browsed." Browsing was also heavier on small cuttings than on large ones.

"Aspens," authors believe that cutting practices and other management techniques can help both the forest and the deer. Hunters have long known that cutting is indispensable to the carrying of a large deer herd in Upper Peninsula forests, as there must be young growth on which the animals can feed. "Aspens" points to new knowledge about deer feed that must be considered by deer managers if they are to provide maximum game.

There are some incompatibilities in multiple use of forests for recreation and for wood production, but there seems no basic conflict in aspen management for deer and wood. When the herd is too large, the forest does not regenerate and deer live in and on the forest.

Aug. 5 To Mark 85th Anniversary Of Phone Exchange

Aug. 5 will mark the 85th anniversary of exchange telephone service in Michigan. On Aug. 5, 1878 that the original switchboard was placed in operation in downtown Detroit.

Connecting 53 telephones, the first exchange consisted of a crude box-like switchboard with small manually operated switches to provide interconnection of telephones. Boys who were messengers for the American District Telegraph Co., also served as the first operators and freely sassed customers who insisted on quick connections.

On Sept. 15, 1881, Michigan's first long distance line was placed in operation between Detroit and Port Huron.

From those early beginnings, the telephone industry in Michigan has grown to where there are more than 3,500,000 telephones throughout the state, 3,138,000 of which are in the territory served by the Michigan Bell Telephone Co.

Obituary

MRS. CATHERINE DHOND

Funeral services for Mrs. Catherine Dhondt were held at 8 a.m. today at All Saints Church with Rev. Matt LaViolette officiating. Burial was in Fernwood Cemetery. Pallbearers were Joe Hillewaert, Oscar Willmott, Ernest T. Biergen, Frank Quinn, John Smith and Lionel Sabourin.

MRS. MARIE LACOMBE

Funeral services for Mrs. Marie LaCombe were held at 9:30 a.m. today at All Saints Church with Rev. Charles Reinhart of Gwinn officiating. Burial was in Fernwood Cemetery. Pallbearers were Martin and Melvin Cassell, Wesley Pease, Martin and Melvin Gagnon and Kenneth Perrin. Honorary escorts from the Women's Catholic Order of Foresters were Mesdames I. S. Willis, Joe Martin, Arthur and Romeo Thivierge, Al Lauscher and Louis Weingartner; from the Daughters of Isabella, Mesdames Paul Hubert, Edith LaMay, Edna Ambeau and Bessie Rogers.

Mine Dam Order Hearing Aug. 21

The Water Resources Commission will hold a public hearing at 1 p.m. Wednesday, Aug. 21 in the city hall at Negaunee on application of the Cleveland Cliffs Iron Co., operating agent for the Empire Mining Co., for a permit to impound water in a reservoir on Schweitzer Creek.

The Empire Mine asks permit to dam the stream except for a minimum flow of 1,400 gallons per minute. The water diverted would be used in the beneficiation of low grade iron ore at the Empire Mine, now being constructed near Palmer.

Berry Picking Slim In State

Wild berry pickings in Michigan will be pretty slim this summer as the result of late frosts and dry weather, the Conservation Department reports.

At best, this year's blueberry crop is spotty, and it will take more than the usual amount of searching to find the better areas. Even in most of these places, which are few and far between, the supply of blueberries will be only fair compared with average years.

Recent rains may help blueberries in some areas, but not enough to offset the damage already done by the weather.

It also shapes up as a poor season for wild raspberries and blackberries which were hit by killing frosts in late June and the long drought that lasted through the early part of July.

Department field men advise berry pickers to seek out low, shaded areas for best results. The season for picking blueberries will begin shortly above the Straits.

Van Remortel Is Awarded Degree

Wayne C. Van Remortel, the son of the Carl Van Remortels of Fayette, was awarded a Master of Arts degree from Western Michigan University at graduation exercises at Kezar Stadium, Kalamazoo, Friday evening.

Presently head basketball coach and baseball coach at Armada, Mich., Wayne is a graduate of Cooks High School.

Sailing Race For Bissell Trophy To Be Held Sunday

The 1963 sail race for the John Bissell trophy is scheduled to get under way at 10 a.m. Sunday at Escanaba, weather conditions being favorable. The race is to Gladstone and return and the starting and ending line are at the "L" dock in the Escanaba basin.

Bill Boyce of Escanaba was the 1962 trophy winner. The trophy for the sailing event was donated in 1941 by the late John Bissell of Escanaba.

Sailing craft less than 30 feet in length are eligible to enter the race, which is over a 14-mile course from Escanaba to Gladstone and return.

Hospital

Patients admitted to St. Francis Hospital on Friday included: Mrs. Walter Olander, Harris; Mrs. Evelyn Boddy, 322 S. 7th St.; Louis Johnson, Rte. 1, Escanaba; and Jeffery LaVigne of 1501 Stephenson Ave., Escanaba.

Mrs. Arvid Isaacson of 418 1st Ave. S. is a surgical patient at Marinette General Hospital. Her room number is 317.

Stephenson High Gets 3 Teachers

Miss Janis Freis of Wallace, Michigan has been hired to teach homemaking in Stephenson High School. She received her B.S. Degree from Northern Michigan University and attended Michigan State University for her first two years of training.

Miss Grace K. Burch of Cleveland, has been hired to teach mathematics in the high school. She received her B.S. Degree from Baldwin-Wallace College in Berea, Ohio and has taken graduate work at Bowling Green, Ohio and the University of Illinois. Miss Burch has had six years of teaching experience in Ohio.

Mrs. Nelly Bonville of Cedar River is to teach in the Commercial Department of the high school. She is a graduate of Ferris Institute and has taken graduate work at the University of Tennessee, Tulane University and University of Maryland.

Mrs. Bonville has had 12 years of teaching experience. She lived in Chinon, France for 3 years while her husband served in the Armed Forces. She served in the Women's Army Corps for 3 years. She is the mother of 2 children. Mr. Bonville is serving in Viet Nam.

Island Plant Near Pittsburgh Has \$500,000 Blaze

PITTSBURGH (AP) — A spectacular fire at a chemical plant in a sprawling complex of chemical and gasoline manufacturing and storage firms on suburban Neville Island was brought under control today after six hours.

Fire fighting officials said the blaze at the Neville Chemical Co., on an isle in the Ohio River about five miles from downtown Pittsburgh, was no longer dangerous.

"The fire will continue for several hours but we feel it is now under control," said David Balsley, deputy fire marshal for Allegheny County. "The danger of explosions has apparently past." There were no serious injuries reported, although one worker suffered flash burns of the face when the blaze erupted at around 2 a.m.

At least five of the 200 firemen battling the fire were treated at a hospital for smoke inhalation. Fourteen other employees working at the 10-acre site on the midnight shift apparently escaped injury.

H.J. Shear, manager of the plant, estimated damages at about a half million dollars.

Delta Tackles Bridge Problems With New Prefab

Delta County is blessed with rivers that create hundreds of miles of riverfront that will be the area's ticket to riches with eventual development of its recreational potential.

But meanwhile those datted rivers, which flush their waters down in the spring floods like the cataract at Lodore, are a big,

Young Draftees Getting Brighter

WASHINGTON (AP)—Draftees today are brighter boys than those inducted during World War II and Korea, the Pentagon's personnel experts believe.

Mental standards for inductees were raised last May 1. But the trend toward more selectivity in Selective Service had been under way for several years. Soldiers have to be mentally sharper because the equipment they handle now is more complex.

Since Korea, only the Army has used the draft. Asked how present draftees stack up against those of the past two wars, the Army said:

"On the average, the quality of draftees today is better than World War II and Korea because the mental standards for induction are higher. Therefore, fewer lower mental category personnel can qualify for service. On the other hand, fewer high mental category personnel are being inducted today because of a smaller draft than in World War II and Korea."

The rejection rate on the basis of mental tests (which really mean how much native intelligence and ability to learn a man has) is higher now, partly because the military can be more selective in peacetime than in war. Moreover, deferments for those who qualify can be and are higher in peacetime.

Physical standards have not changed.

Army Now 970,000

Lt. Gen. Lewis B. Hershey, director of Selective Service, estimates, for example, that about 300,000 are deferred now so they can go to college. But, in testimony before the House Armed Services Committee recently, Hershey hastened to say that "I don't want to claim that we are keeping these boys in college, because we couldn't induct them in any great numbers if they didn't go to college."

Hershey's view seems substantiated by draft quota figures. Only 4,000 draftees were asked by the Army for each of the months of January and February, while the high point so far this year is the 12,000 monthly quota set for August and September. Army strength now totals about 970,000.

Law Extended

The draft law was extended for another four years by the present Congress. How long will a draft system be needed?

"It is our judgment," say the military manpower experts, "that the Selective Service System and the authority to induct will be required so long as the international situation remains substantially unchanged."

There was a 15-month period in 1947-48 when the draft law lapsed, after the end of World War II and before the Communist threat began looming large. But since September 1950, a total of 2,845,450 will have been drafted when the September quota is filled.

pounding, pyrotechnic headache for the Delta County Road Commission, which is charged with bridging them where roads cross so that wheel traffic can move over them.

A Road Commission bridge survey in 1937 showed that the county had 68 highway bridges. Currently the Road Commission is updating its bridge survey, with Bob Karas, a Michigan Tech student, in charge of the study. It shows that Delta has 38 bridges on town roads that are not eligible for federal aid in reconstruction.

"Those 38 bridges are scheduling themselves for replacement," says William Karas, Delta County highway engineer-superintendent. "They're used by milk trucks, school buses, mail carriers and — (often dangerously beyond their safe carrying capacity) — by logging trucks as well as private cars."

Many of these old bridges date to 1910 and even farther back. Their abutments are of concrete made with pit run gravel and no reinforcing, constructed on clay and mud without footings so that they eventually erode away, or shatter and collapse into the streams.

Karas had made a file of pictures of these old bridges which looks like a chamber of architectural horrors. It would dent the confidence of highway users who never get out of their cars to look underneath the bridges they cross.

The only way to finance replacement of these dangerous old bridges — logging trucks crashed through three such bridges in one township this year — is by the county and township. Because they're on local roads they're not eligible for the federal matching funds which are available on the primary road system.

Where federal funds are available the county has been contracting for replacement of old bridges as fast as possible. Because bridges are expensive, the work must be fitted into the county's overall program of highway construction, reconstruction and maintenance so it doesn't drain too much from them.

But the hard knot of the old bridges on town roads remains. Karas and the road commission are now attacking it with a new program and a new bridge.

"We have designed a bridge that can be prefabricated in our shop with our crew and equipment," said Karas. "The federal aid bridge jobs by contract called carpenters for concrete forming and for concrete men and other skills that we don't have. The chief skill needed for our new bridge construction is welding and we have that. We can do the prefabricating work at any time we don't have other work and a crew of only three men can erect one of these bridges."

Construction starts with pouring of a footing in which anchor bolts are set. The inverted "U" frames of I-beams are welded to bed-plates on the footings and bolted down. The width of the bridge determines the number of U frames to be used. Corrugated steel sheets are welded to the risers and hold the earth fill of the bridge approach. Corrugated plates are also used to form the deck that carries the blacktop roadway, and to form approach wings.

The I-beams are 18 inches high with 8 inch flanges and they are spaced 3 feet apart. Nine have been used in construction of a 33 x 24 foot bridge over the Tacossh River to replace an old wood structure, and 7 to hold up a 33 x 18 foot span on the Days River which is now under construction.

It cost \$18,000 to build a 33 x 24 foot pre-cast concrete bridge on the Days River by contract in 1961 and Karas hopes to build one of the new 33 x 18 prefabricated steel bridges for \$8,000. The county and township will share the cost.

There's a chance for action now in any Delta County Township that has \$4,000 and a bridge problem.

Escapers Hunted In Jackson Area

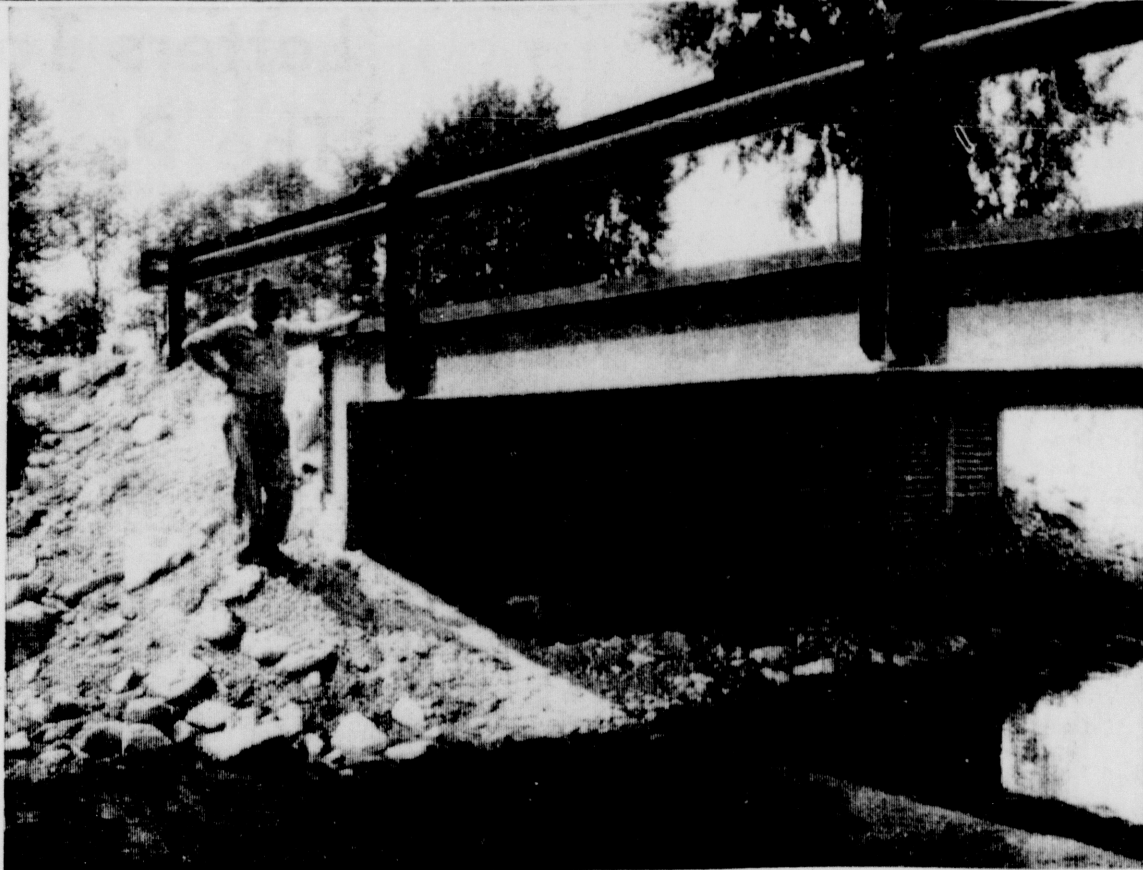

JACKSON (AP) — Police today are combing the Jackson area for two men who walked away from a Southern Michigan Prison Farm Friday night.

William E. Couarm, 35, who was sentenced to Monroe County for assault to murder, and Floyd McDevitt, 27, who was sentenced from Ingham County for breaking and entering, were last seen at the farm at 9:15 p.m.

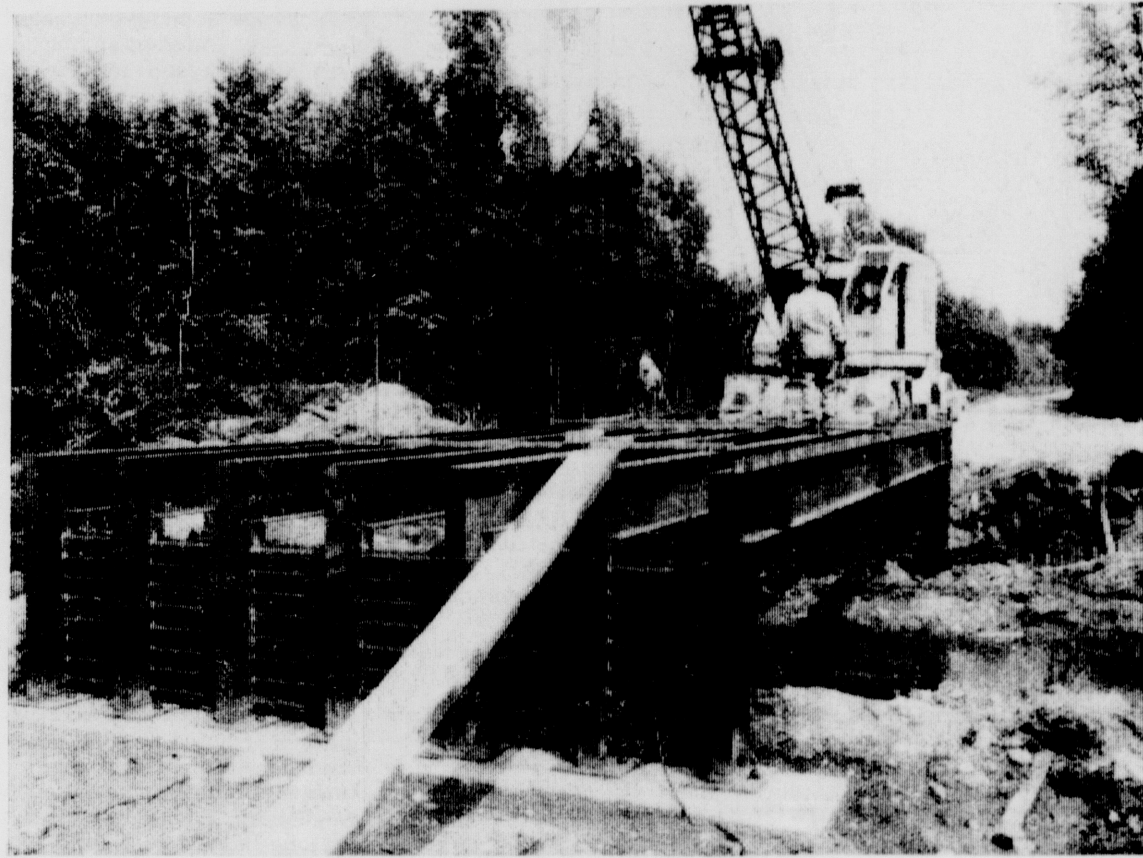

LIFE IN BIG CITY

NEW YORK (AP)—New York's subway system covers 236.7 miles of track, with 482 stations. Subway operations were started in October, 1904, with a nine-mile route from City Hall north to 42nd Street and Lexington Avenue, thence west to Broadway, and ending uptown at 145th Street and Lenox Avenue.

In the 12 months ending June 30, 1962, the subways carried 1,369,507,594 passengers.

William Karas, Delta County highway engineer-superintendent is pictured with one of the new steel bridges which he designed to make maximum use of Delta County Road Commission resources in manpower, skills and cash outlay in meeting the county's big bridge problem. This newly completed bridge is on the Tacossh River on County Road I-26. The "I" designates Masonville Township. (Daily Press Photos by Bernard Schultz)

A Delta County Road Commission crew of three men erects a bridge, prefabricated in the county's road shops on the Days River on County Road F-4 to replace a wooden structure that deteriorated into uselessness. The workmen are Frank Svehla, Welder, foreground, Fred Ames, rear, and Lee Boyer, operating the crane, a Civil Defense machine which cost the county \$500 brand new. Civil Defense welding and air compressing equipment are also in use on this bridge project.

Indian Town Sites Sought By Quimby

A search for sites inhabited by Indian tribes of the 16th, 17th and 18th centuries is being conducted in Michigan, Wisconsin and Ontario by George I. Quimby of the Chicago Natural History Museum, who was in Escanaba on Friday in pursuit of information from local Indian "relic" collectors.

Construction starts with pouring of a footing in which anchor bolts are set. The inverted "U" frames of I-beams are welded to bed-plates on the footings and bolted down. The width of the bridge determines the number of U frames to be used. Corrugated steel sheets are welded to the risers and hold the earth fill of the bridge approach. Corrugated plates are also used to form the deck that carries the blacktop roadway, and to form approach wings.

The I-beams are 18 inches high with 8 inch flanges and they are spaced 3 feet apart. Nine have been used in construction of a 33 x 24 foot bridge over the Tacossh River to replace an old wood structure, and 7 to hold up a 33 x 18 foot span on the Days River which is now under construction.

It cost \$18,000 to build a 33 x 24 foot pre-cast concrete bridge on the Days River by contract in 1961 and Karas hopes to build one of the new 33 x 18 prefabricated steel bridges for \$8,000. The county and township will share the cost.

Treaty Is Step Toward Peace, President Says

(Continued From Page 1)

of unrestricted testing, the risks of a nuclear arms race, the risk of new nuclear powers, nuclear pollution, and nuclear war."

The partial ban, he said, is "safer by far for the United States than an unlimited arms race."

Kennedy said the pact had four meanings "to you and your children and your neighbors:

1. It can be a start toward a reduction in world tensions and toward broader areas of East-West agreement.
2. The treaty could help free the world from the fears and dangers of radioactive fallout.
3. It could be a move toward preventing the spread of nuclear weapons to nations other than the four now possessing them: the United States, the Soviet Union, Great Britain and France.
4. It could check the nuclear arms race in a manner which, on balance, would strengthen this country's security far more than a continuation of testing.

Blind Boy Rides On Welded Bike

RAMSEY, N.J. (AP)—A man who loves children and bicycles has built a bike that will enable a blind 8-year-old boy and his mother to ride side-by-side.

"Wanted, two 24-inch bikes, so my daddy can have them welded together for mommy and me to ride together. I'm 7½ and blind. Kenneth Jones, 40 High Street, Ramsey."

Mrs. Paul Jones, Kenny's mother, said "a woman from Englewood was kind enough to donate two bikes and Mr. (Wallington) Simpson volunteered to build the bike."

Marquette Dock Blasts Linked To Shipping Dispute

MARQUETTE (AP)—Two dynamite blasts caused minor damage to railroad tracks in two sections of Marquette's harbor Friday. Police said they possible were connected with a Great Lakes shipping dispute.

Police expressed belief the blasts, two miles apart, went off at the same time Thursday night. They said the incidents could be connected with the dispute between Upper Lakes Shipping Co. and the Seafarers' International Union.

No one was injured in the dynamite blasts of Soo Line and Lake Superior & Ishpeming Railroad tracks. Only minor repairs were required and train traffic was not held up, police said.

An Upper Lakes ship, the Red Wing, was due to arrive at Marquette today to take on a load of iron ore. Police said they expected operations to proceed normally. No special guard would be posted, they said.

The Red Wing has been picketed four times in recent stops here. Picket signs alleged jobs of American seamen on the Great Lakes were being lost because Upper Lakes hires Canadians.

Circuit Judge Ernest Brown stopped SIU picketing June 25-27 with a restraining order against the union. He said "the real purpose of the picketing is to coerce the Upper Lake Shipping Co., and to compel it and its employees to become members of the SIU."

Daily newspaper classified ads are a major advertising medium. Eight hundred million dollars were spent on classified ads in 1962, more than for all television spot announcements or all radio advertising. A Daily Press want ad can do a big job for you.

Forest Lab At Tech Gets Aid

HOUGHTON — Last week's Senate approval of a \$28,000 appropriation for design and specifications of a new forest engineering research laboratory marks the first step in the construction of a new forestry complex on the Michigan Tech campus.

M. B. Dickerman of St. Paul, director of the U. S. Forest Service Lake States Forest Experiment Station under which the engineering research lab will operate, expressed delight at Senator Philip A. Hart's news of the appropriation.

"Nowhere in the Lake States region could we locate such a unit more favorably," said Dickerman. Plans call for locating the forest engineering lab facilities in a forestry complex that will include new facilities for Tech's Department of Forestry and Forest Products Research Division.

The forest engineering research laboratory was established on the Michigan Tech campus in 1961, and has occupied temporary quarters since that time. Rulon B. Gardner is project leader for the laboratory and John Erickson is mechanical engineer.

Gardner said the facilities will include laboratories, offices, study rooms machine shops for construction and modification of equipment prototypes for testing, and a vehicle and pilot test assembly area.

When the facilities are completed, plans call for adding 10 more scientists to the staff, along with the necessary clerical and service personnel. A number of Michigan Tech graduate students will also be employed by the laboratory.

Purpose of the Lab is to solve engineering problems associated with forest management and utilization peculiar to the hardwood forests of northern and eastern United States.

Knudsen Heads Tech Parents

HOUGHTON — S. E. Knudsen has accepted appointment as chairman of the newly-formed Michigan Tech Parents Committee.

Knudsen is a vice president of General Motors Corp., and general manager of the Chevrolet Motor Division.

Purpose of the committee is to improve communications between the college and students' parents.

Mr. and Mrs. Knudsen have three daughters and one son. The son, Knud Peter Knudsen, will be a senior mechanical engineering major at Michigan Tech this fall.

One of the committee's first projects will be the creation of a quarterly communication from Knudsen to other Tech parents. This will provide parents with a summary of current college activities.

When fully organized, the committee will be a national organization with regional chairmen working under Knudsen's direction. The Parents Committee will

S. E. Knudsen

complement the work of Tech's Alumni Association.

Knudsen, a native of Buffalo, N. Y., attended Dartmouth College then Massachusetts Institute of Technology. He is the son of the late William S. Knudsen, who served as general manager of the Chevrolet Motor Division for 11 years and was president of GM from 1937 to 1940.

Return To U.S. Students Told

WASHINGTON (AP) — In the news from Washington:

STUDENTS: The 58 American students who went to Cuba against official U.S. wishes have, in effect, been ordered by the State Department to do no more traveling except to return to the United States.

A member of Congress, Rep. William C. Cramer, D-Fla., says the action by the State Department is no more than a "slap on the wrist" and demanded that the leaders of the students be prosecuted.

Richard I. Phillips, State Department press officer who announced Friday that the students' passports have been tentatively withdrawn, said the question of criminal prosecution is up to the Justice Department.

A-OKAY: Things are apparently less than "A-okay" between the nation's space agency and Air Force Lt. Col. John A. Powers, who became known to millions of Americans as "the voice of Mercury" in America's man-in-space program.

Powers, who is credited with coming the term "A-okay" to indicate "Everything's fine," is losing his job as spokesman for the astronauts.

After a meeting with James E. Webb, administrator of the National Aeronautics and Space Administration, and deputy administrator Hugh L. Dryden, Powers said: "I am sure my role is going to change."

A source at NASA's Manned Space Flight Center at Houston, Tex., said Friday Powers will remain with NASA but he "will not be in public affairs."

POSTMASTER GENERAL: The field is apparently wide open for the job being vacated by Postmaster General J. Edward Day.

An authoritative White House source has knocked down a report the Cabinet post might go to former Sen. Benjamin A. Smith of Massachusetts, a former Harvard roommate of President Kennedy.

Day is quitting in two weeks to return to private business.

K-12 Districts House 93.4 Pct. Of School Pupils

Michigan's school districts, reduced by more than 200 during the 1962-63 school year, now house 93.4 per cent of the state's children and 95.09 per cent of the tax valuation in K-12 districts.

Dr. Lynn K. Bartlett, state superintendent of public instruction, points out, that however while this high percentage is commendable, approximately one of every 10 youngsters in out-state Michigan does not reside in a district which offers a complete 12-grade program.

Closing figures for the 1962-63 school year showed Michigan with 1,583 districts, 554 of which offer K-12 education or are in the process of acquiring the high school grades. The K-12 districts are serving a membership of 1,676,657 children. A year ago, 1,789 districts were in existence.

"Fifty years ago, in 1910, we had 7,333 school districts, and as recently as 1957, when I took office, there were 3,190 districts in Michigan, which shows a decrease by more than half in just six years," Dr. Bartlett said. "So, while we are definitely making progress in reorganizing our school districts to provide full educational opportunity for all our youngsters, the fact that so many out-state youth in these modern times are not housed in K-12 districts should spur concerted efforts to insure them their full educational right."

For this reason, Dr. Bartlett said, a reorganization study bill, either the same or very similar to the one that failed of passage last spring, will be introduced in the next legislative session. "This bill offered an extremely equitable solution to our reorganization needs in that it provided for district self-appraisal and encouraged an orderly and well-planned reorganization of our districts but left the final decisions and actions strictly with the local voters."

Commenting on Alpena's recent mergers which have resulted in the state's first county school district, Dr. Bartlett calls it a good example of consolidation to serve a logical geographic area. "The Alpena Public Schools actually transcend county lines to include 44 students in Presque Isle Township, Presque Isle County, and will enroll nearly 7,000 students in September. The cooperative spirit that voters of Alpena County have shown to provide adequate high school facilities for their youth will bring great educational and economic benefits to this community."

The new Alpena School District was formed by a series of eight annexations and one transfer of property within the county over a period from January, 1962, through May, 1963. The Presque Isle district was annexed to Alpena in 1957.

The bids included five on construction, five for mechanical, four on electrical and three for equipment. Knox also stated that a complete review of the county's financial condition will be made prior to Monday's meeting.

Seventeen Bid On Alger Jail

MUNISING—The Alger County Board of Supervisors received 17 bids for the construction and equipping of a new county jail and sheriff's quarters at a special meeting this week at the courthouse. The bids were tabled until the next regular meeting, Monday at 7 p.m.

The bids included five on construction, five for mechanical, four on electrical and three for equipment. Knox also stated that a complete review of the county's financial condition will be made prior to Monday's meeting.

Where's The Truth?

The Michigan AFL-CIO sent its staff representative, Robert Dingwell on a tour of the Upper Peninsula to do a hatchet job on Governor George Romney in a series of trade union member meetings.

The newspapers of the Upper Peninsula have been asked by the AFL-CIO to publish the charges that Dingwell made at these meetings. What the AFL-CIO thinks of Governor Romney is its own business, but the newspapers have responsibility to be objective and when Dingwell charged that "special interests, including Romney's own American Motors Corp., really hit pay dirt (with the Ford-Canton Bill)" some explanations are in order.

Dingwell added "the same measure that took benefits away from unemployed workers gave a huge tax bonanza to the state's largest corporations. . . . The Governor's signing of the Ford-Canton Bill represented a conflict of interest since he is going to benefit financially from its provisions" (as a holder of American Motors Corp. stock).

The AFL-CIO doesn't call the tune in the governor's office under Democratic governors any more and hence the attack. Back in May Democratic State Chairman Zoltan Ferency called the "negative balances" in the unemployment compensation fund "legitimate indebtedness" to the fund. In that period the Democrats in the House in a shirtdance session which the Republicans didn't know about resolved to "investigate" alleged "conflict of interest" if Governor Romney signed the controversial Ford-Canton Bill.

It was the judgment of many Lansing observers that the Governor was as near as he could get to the public interest on the bill as he was criticized by both the unions and industry. The Detroit News commented editorially at the time to set the matters straight. It said Ferency's charges demonstrated "his willingness to spout without knowing whereof he spouts."

Dingwell gave the old charge another spout in his U.P. talks to labor. It was charged that the Ford-Canton Bill's cancellation of "negative balances" was a giveaway which benefitted, among others, American Motors, which Romney formerly headed. AMC's negative balance was reported to be over \$1 million.

"A negative balance," the News explained "is not money owed to the unemployment compensation fund, and its cancellation 'forgives' no debt. Unemployment compensation is an insurance system financed by payroll tax on employers. No single employer is solely responsible for financing every dollar paid to his own employees when they are laid off (if he were, there would be no need to set up an insurance system). In accordance with the insurance principle, the system pools the risk."

"But because some employers offer employment less stable than others and therefore cost the fund more, Michigan uses 'merit rating' which requires such employers to pay a higher tax rate than do stable employers."

"A company's negative balance is the amount the fund has paid out to its employees beyond what it has paid in. The record is kept simply to indicate the degree to which the firm's employment is unstable, as a measure of how much higher than the minimum its tax rate should be. It is not owed to the fund; it is not 'repaid.'"

"The principle is sound," insists the News. "Employers who cost the fund more should pay more into it. But a number of Michigan firms which were badly hurt in the recessions of the 1950s are stuck with large negative balances. Many of these have now stabilized their employment and cost the fund no more than average, but their old negative balance will still keep them at the maximum tax rate forever—an added hurdle in the way of complete recovery."

"The bill cancels present negative balances, if the employer wishes. But because his record was poor, it keeps his tax rate at the maximum for another three years, and if by then he has run up a new negative balance, indicating continued instability of employment, his tax will go higher yet. Negative balances were automatically cancelled each year, incidentally, until 1954."

"The net effect is to give a fresh start to firms which have now gotten squared away, while continuing the maximum rate for those who still cost the fund an above-normal amount of money."

"This is not a giveaway. It is a sane and sound way to take a needless burden off the backs of a number of firms whose continued health and vitality means much to Michigan workers. And if some Democrats weren't so pathetically eager to find something—anything—to throw at Romney, they might be able to admit the fact, too."

Finding The Way

Why We Try And Try

By RALPH W. LOEW, D. D.

After thousands of years of trying to develop a responsible sense of freedom, why should anyone keep on trying? And yet the New Testament tells of a night of bad fishing, after which the luckless men were tired. They decided that they'd had enough. These were the men whom Jesus challenged to let down their nets once more, hope once more, and perhaps come back with another success. It's an apt story for these days.

The weariness of endless discussions, the patience required of diplomats who are called upon to sit down once more—all of this requires a sense of persistent patience.

It doesn't take much of a person to be tired. It does take a person of good faith to be persistently adventurous.

It doesn't take much of a country to be weary of protest and rebellion. It does take a great people to understand the driving urgency and to meet it with wisdom.

It doesn't take much of a person to be drained of faith. It does take a person of great resources of patience to continue belief when the going is rough.

The problems besetting society are not new; they appear before us because of the dramatic insistence of men to demand our attention. If anyone says, "But I've tried to do something about this problem and it didn't work," that isn't enough of an answer. Some-

one has to keep on working at the problem.

There are too many people who believe that the ideals of religious people are beautiful, interesting and impractical. They criticize the church by stating that the Christians are only concerned about their self-preservation and not in the wearying risks of a great moral adventure. Some of us would like to challenge them to see the whole truth, and understand some of the adventure that is going on locally.

Nonetheless, too many of us get tired and quit. If we're too tired to go to church, who will bring a public witness in our neighborhood that anyone cares?

If we are too tired to pray, who will plumb the depths of spiritual resources in these crisis times?

If we're too weary to try to see a problem objectively, how can we understand the damned-up frustrations that are now bursting out across our nation?

We're not the first to have been caught in such dilemmas. St. Paul called to the men who were thinking of giving up, "Don't be weary in well-doing. Don't lose the zest for life."

Those who have kept on trying are the ones who have kept the meaning of wisdom and understanding alive in trying times.

"The Bomb?" "No, the S.E.C.!"

Edson In Washington State Briefs

By PETER EDSON

WASHINGTON—(NEA)—Planned enlargement of the U. S. Peace Corps from 7,000 to 13,000 volunteers overseas in the next year is probably going to be approved by Congress eventually.

But right now, the New Frontier's most successful two-year-old experiment is having more troubles in Washington than abroad.

If President Kennedy's request for an increase in the Peace Corps budget from \$59 million last year to \$108 million this year had gone to Congress as a separate bill, it would have sailed through with almost no opposition.

But the Peace Corps appropriation is part seven of the eight-part foreign aid bill which Congress wants to cut by \$300 million to \$400 million.

Psychologically, congressmen find it inconsistent to cut the other seven items, then turn around and give the Peace Corps more funds.

The Peace Corps also has become confused in some people's minds with the proposal to create a Youth Conservation Corps, a National Service Corps which has been described as a domestic Peace Corps, and the Home Town Service Corps.

The three are parts of Kennedy's youth employment program, which has run into considerable congressional opposition.

The real Peace Corps suffers by association with these new proposals, although they're in no way related.

Finally, the U. S. Peace Corps has taken a beating in Washington because it had been accused of promoting an International Peace Corps. They're two different things.

Richard N. Goodwin, former White House and State Department Latin American adviser, has been assigned to head up an International Peace Corps secretariat.

This unit rents space in the Peace Corps building in Washington. But its job is to pass along information about the U. S. Peace Corps to other countries which may be interested in setting up similar organizations of their own.

Thirteen countries expressed such interest at a Puerto Rico conference earlier this year. Seven European countries already have organized Peace Corps. And Israel Peace Corpsmen will take over a road-building program in Tanganyika, where 35 young American civil engineers have completed two years' service.

Sargent Shriver Jr., U. S. Peace Corps director, says the United States can't begin to fill the world-wide demand for this type of technical assistance.

Shriver estimates the total at 50,000. There just aren't that many young Americans volunteering to serve.

The Peace Corps now has a file

of 3,000 applications. Examinations for corpsmen will be held in 800 U. S. post offices.

These exams are not just for youngsters out of college, but for older volunteers, too, for there is a demand for hundreds of senior corpsmen—older people with more experience.

So rigid are Peace Corps requirements, however, that only one out of every six applicants is accepted for training. The Peace Corps will fill only 6,000 new jobs next year.

The corps' largest project took 500 U. S. teachers to the Philippine Islands, each to upgrade the work of 20 native teachers. In training are 150 more U. S. corpsmen for the Philippines, but the government wants 600.

Such stories can be repeated in nearly 50 countries. This is perhaps the best measure of Peace Corps success in its first two years of operation.

Memory Lane

By J. R. LOWELL

Ten Years Ago

The first polio cases of the year in Escanaba were reported this week. One of the youngsters, John Steinway, 4, son of Mr. and Mrs. Curtis H. Steinway, 1115 S. 9th St., has been admitted to St. Luke's hospital in Marquette; the other, Rosemary McInerney, daughter of Dr. and Mrs. McInerney, 1029 S. 13th St., is being treated at home.

Eleven Delta county men have lost their lives in the Korean war, according to a recent survey made by the local American Legion post. These were Lt. Donald G. Anderson, Pvt. Leon C. Clifton, Pvt. William P. Finlan, (Gladstone); Pvt. Donald C. Hira, Pvt. Robert L. Keshick, Pvt. Irving P. Matthews, Pvt. John Henry Stewart, Pfc. Norbert J. Young (Cornell) and Pfc. Robert J. Rogers.

The Manistee Lions club members took on a team made up of Lions club members from Seney and Germfask last evening in a very novel baseball game. All participants played the game as true as the backs of very obstinate non-cooperative donkeys, but in spite of this there were a few scores made. The visitors won 4 to 3.

John Bugas, head of the Detroit office of the FBI, speaking before the sheriff's convention now being held in Escanaba, declared that juvenile delinquency is the nation's gravest problem today.

The Rev. Fr. Joseph Guertin, pastor of St. Anne's church, is observing the 25th anniversary of his ordination into the priesthood. Second Lt. Harold J. DeKeyser, son of Mr. and Mrs. William DeKeyser, of Gladstone, in the air service in the Middle East, is a war victim, according to word received by his parents today.

Thirty Years Ago According to a recent survey by the Michigan Municipal League, Escanaba has a bonded indebtedness of \$429,876 or a per capita debt of \$20.10.

An all-star boxing show in Detroit this evening, will include a match in which "Frenchy" LaLonde, of Manistique will be featured.

G. W. Putnam, manager of the Upper Peninsula Experimental farm at Chatham, has resigned to take over management of a 4,800 acre farm near Columbus, O.

KALAMAZOO (AP)—The Amalgamated Lithographers of America have been designated by the National Labor Relations Board as bargaining agent for 70 printers at the K.V.P. Sutherland Paper Co. The company said the NLRB decision is being studied. The printers struck in a jurisdictional dispute 11 months ago.

LANSING (AP)—Michigan's radiation is far below any danger level, the State Health Department reported Friday. A slight increase in the last month was reported. A department spokesman said slightly more cesium 137, a radioactive substance, was found in milk and water samples.

MUSKEGON (AP)—The Brown-Morse Co. and Local 693 of the allied Industrial Workers announced settlement Friday of a wage and job classification dispute which had halted production since July 15. The company and union agreed to a contract amendment providing for compulsory arbitration of future grievances.

DETROIT (AP)—With a statement that water fluoridation has shown its value across the nation for many years, the president of the Michigan State Dental Association, Dr. Edward A. Cheney, Friday hailed court approval of Detroit's new fluoridation ordinance. Circuit Judge George E. Bowles ruled the ordinance constitutional earlier this week. The dental profession says fluoridation helps to prevent tooth decay.

KALKASKA (AP)—Purchase of the Wood Mill from Russell Wood by three Ferndale men with plans to produce pre-cut houses was announced by the Kalkaska County Area Redevelopment Committee. Spokesmen for purchasers Howard J. Terwilliger, Judge Earl N. Nash and Charles F. Jaeger said the new operation would add 50 jobs here by next January.

SCOTTVILLE (AP)—Manistee's city treasurer-finance director and former city police officer, Gerald E. Russell, 24, leaves his post Aug. 19 to become city manager at Scottville. Russell was a 1956 graduate of Manistee High School.

WASHINGTON (AP)—The Air Force has awarded a \$6.5 million contract to Knatt-Stiles Inc., Grand Rapids, Mich., for the manufacture transportation and erection of relocatable-type houses. Sens. Philip A. Hart and Pat McNamara, Michigan Democrats, announced Friday.

DETROIT (AP)—Detroit Symphony Orchestra musicians voted 61 to 14 Thursday to accept a new three-year contract. The Detroit Federation of Musicians had recommended approval of the pact.

WASHINGTON (AP)—The Bureau of Mines reports Michigan is among the leading states in number of operating petroleum refineries. Michigan, with Indiana and Ohio, has 12 refineries. Texas leads the nation with 55 of the total 287 operating refineries.

LANSING (AP)—State Police have announced plans for the annual Michigan Police Pistol Shoot Sept. 5 at the Jackson City police range. The shoot is the largest all-police competition in the U. S.

LANSING (AP)—Two veteran State Highway Department employees will retire next month. One of them is Paul Ueberhost, district bridge engineer in Detroit since 1945. The other is Arthur

MUNICIPAL PAY

After reading an article in the Escanaba Daily Press on July 14 regarding municipal workers' continuing efforts for consideration, I feel it is my duty as representative of Local 78, AFSCME, to present a better understanding of the situation.

The original request of our organization was for a general wage increase. Since living costs have continued to mount, month after month, our concern naturally would be an effort to keep abreast of these. However, after many months of negotiations with your City manager and city council and a review of the budget as proposed, I realize any consideration of a general wage increase this year would be inconsistent to the financial structure of the city budget as such.

Therefore, in our last session with the city administration our requests were scaled to a figure of total outlay by the city of less than \$5,000 annually; namely, for night pay differential for night shift workers and for the additional premium assessed the employees by the insurance carrier this year for the major medical insurance policy.

This amounts to less than two tenths of one per cent of the two and a half million dollar city budget. The Press item states that for the first time in many years city workers have not received pay increases. This is true. These past years the city administrators have attempted to bring municipal workers out of their substandard wage category with whatever funds have been available in the budget.

The Press states further that the most unusual aspect of this situation is that the employees continue these efforts in the face of a closed budget. There is a degree of flexibility in any budget. Contingency funds are set aside for such purposes. These requests of ours, if granted, would take less than one-third of this year's contingency fund as compared with wage adjustments last year taking one-half of that fund.

Last year all city employees received from that budget at least five cents per hour increase, which amounted to approximately two per cent. Some department heads and appointed personnel received wage adjustments of considerably more than two per cent from the same contingency fund. That is why a budget is made flexible.

However, there should be no double standards on wage grants. The ones at the bottom should be given the same consideration as the ones near the top. When a city is in a financial squeeze, as Escanaba appears to be this year, the employees are cooperative. That is why requests have been scaled down to within the limitations of the present budget.

Sid Grzenia
Staff Representative
State County & Municipal
Employees
Lansing

Editor's note:

Helpful to readers in clarifying some of the information presented by Grzenia are excerpts from the official proceedings of the Escanaba City Council. The Council has unanimously agreed to "hold the line" against increases in city taxes or utility rates in 1963-64 and the budget for the fiscal year represents their thinking.

From the City Council record of a meeting March 7, 1963:

"The original salary requests were: Electricians, 9 per cent increase; firemen, 5 per cent plus more fringe benefits; Marlin Williams pointed out to the council that the city employees are asking 10 per cent plus more fringe benefits. On behalf of the council, after much discussion had taken place, Mayor Vanlerberghe stated, 'The Council is faced with a two-fold problem of matching expenditures with revenue, and at the same time acknowledging the desire of the employees to receive additional compensation.'"

"The mayor went on to say that there 'has been considerable property taken off the tax roll in the past year,' and that the city's financial picture is changing for the worse, not the better. Mayor Vanlerberghe said that 'without a question of a doubt, we are in a deficit budget' and that on the Board of Review there are hardship cases coming to us and we are told the people demand that there be no increases in taxes."

And April 17, 1963: "The opinion of the Council was unanimous in the belief that there should be no reduction in the present level services and that the present tax and utility rate structures should be retained."

Newspaper want ads are a big sell! Eight hundred million was spent on classified ads last year more than for all television spot announcements or radio advertising.

Hansen, a heavy equipment operator at Kalkaska who began with the department in 1928.

House of the Week

Family Room Ease

"Form follows function" is the phrase architects use in tracing the evolution of design. Today's House of the Week is a perfect example of the truth of the adage.

The main characteristic of today's brand of living is informality, and this handsome one-story house, with a 210-square-foot family room as the hub of daytime activity, follows this function well. Every other aspect of the house including its modest size, likewise was dictated by contemporary family needs.

The house contains only 1,500 square feet of living area in overall dimensions of 29'8" deep by 79'4" wide. Yet it is so well laid out it is perfectly suited for a family of four or five.

Designer of the three-bedroom home is architect Fenick A. Vogel, a man of 30 years experience in suburban home design. The house is design J-86 in the House of the Week series.

Its basic floor plan is rectangular with just enough deviation from straight lines to generate interest without adding unnecessary cost. The exterior features vertical board siding, accented by brick, with a straight and uncluttered roof line. The built-in planters in front are shaded by a deep roof overhang.

Inside, a central foyer divides living and sleeping areas and leads directly to the well-positioned family room.

The family room is accessible from all its four sides, and projects slightly to the rear where sliding glass doors separate it from the rear terrace. An island counter divides the kitchen and family room; the two rooms combined offer more than 230 square feet for daily activities.

Additional Details
While the accent is on the informal area, architect Vogel also designed the formal living and dining rooms with utmost care.

A box bay window overlooking the front yard, and a grand fireplace on the opposite wall, provide excellent opportunities for interesting furniture groupings. Wrought iron dividers separate the dining room which is almost a perfect square. Folding doors, or a screen, could be put here for further privacy.

The bedroom wing offers excellent use of available space; enough hall area to prevent traffic congestion but nothing wasted.

J-86 STATISTICS
A three bedroom ranch containing 2 1/2 baths, living room, dining room, family room, kitchen, utility room, central foyer, double garage and full basement. Contains 1,500 square feet of living area not including garage, in over-all dimensions of 79'4" wide by 29'8" deep.

There are a number of nice design features in the sleeping wing. First, notice the natural sound buffers between the wing and the living area, and surrounding the master bedroom. Also, the two bedrooms are back-to-back for plumbing economy.

But clearly the informal area is the eye-catcher in this house.

The kitchen work area is designed to save steps. Nearby is a utility room which also serves as a mud room for the service entry, and contains the basement stairs. Also there is a lavatory here, convenient not only to the kitchen and family room but also the garage and the back yard.

The house contains a full basement, which can be developed to the owners' taste for recreation and storage. The laundry also could be located in the basement if desired.

L'Anse Awarded 1964 Convention Of U. P. Firemen

LAURIUM (AP) — Upper Peninsula volunteer firemen, meeting here for their 69th convention, designated L'Anse as the site of their 1964 convention.

The group named Gordon Johnson, of Grand River, as president; William Miller, of Laurium, as vice president; Victor Schiavo, of Crystal Falls, second vice president; John Pastore, of South Ranger, secretary, and Leonard Shiroda, of Houghton, treasurer.

If you come across a news tip, don't hesitate to telephone ST 6-4118, Radio WLST.

HOUSE PLAN ORDER

Building Editor, Escanaba Daily Press:

Enclosed is 50c. Please send me a copy of the study plan for The House of the Week. Design, J-86.

Name (please print)

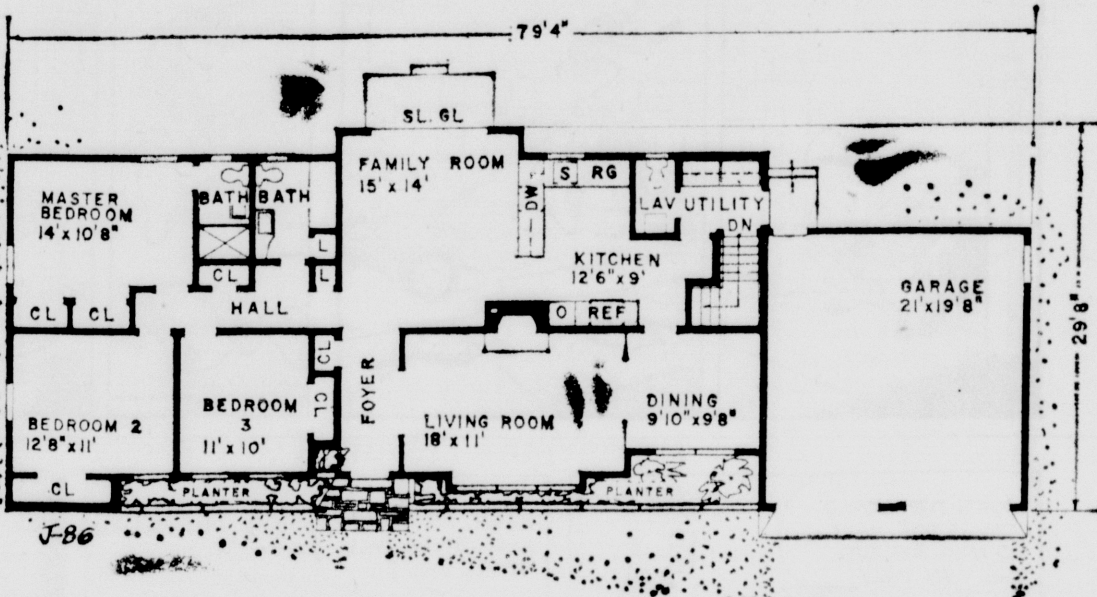

Street

City State

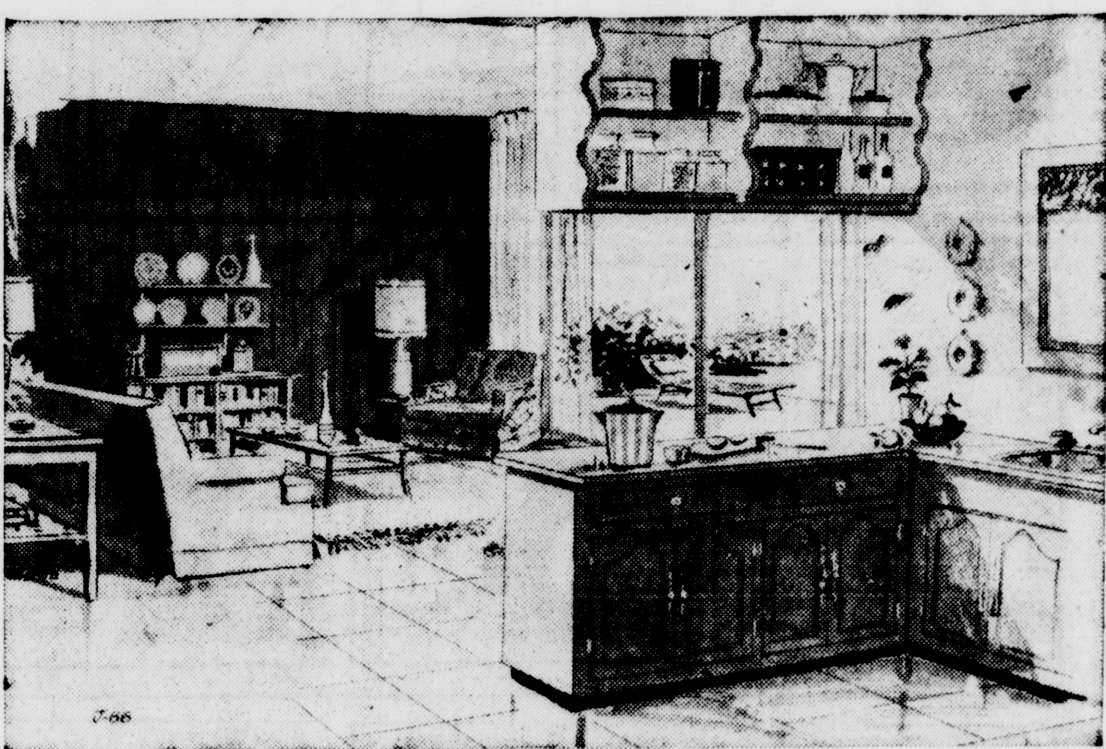

Rum Island, Dog Rock, Fallen Jerusalem, Money Rock and Dead Man's Chest are some of the Virgin Islands named by pirates who used the islands as a rendezvous in the 18th Century.

Long and Low: Planters recessed below deep roof overhangs accentuate the low silhouette of this attractive three-bedroom ranch, and vertical board siding with a touch of brick give it proper balance. Main feature of the house is its well located family room.

Floor Plan: Access to the family room is possible from each of its four sides. House contains 1,500 square feet of living area not including the garage, and it has a full basement.

Family Room: Viewed from the kitchen, the artist's sketch shows the family room with sliding glass doors leading to a rear terrace. An island counter divides the two rooms and serves as a breakfast bar.

People Cause Most Accidents

By F. GRANGER WEIL
Editor

The Port Huron Times Herald
PORT HURON (AP) — You may not like this, but accident causes can be pretty well classified under three headings: fun, fatigue and fatheadedness.

While this is largely true for all accidents, it probably is particularly true of our young people up to age 25. This article will not attempt to detail these three headings. It is easy enough for anyone who thinks about it for a few seconds to make up his own definitions.

You may not like it, but it's true, nevertheless, that it is largely people who cause accidents—and you and I are those people.

Safety experts are extremely concerned over the recent rise in the accident rate for young persons driving alone.

Dr. L. Jerome Fink, Pontiac psychiatrist, and Julia Ann Goodman, of Port Huron, his consulting psychologist, give this analysis of the problem:

"Frequently the driver who is alone is more apt to allow his unconscious drives to take over. The term 'auto' means self, and thus the automobile becomes the symbol of self, and the unconscious aggressions, which are usually released through dreams and fantasies, are acted out behind the wheel of the car. For example, there is the individual who is labeled the psychopath who

acts out his aggressions for kicks and this is the individual who shows his feelings of self-superiority on the highway by his lack of regard for the safety of others. This is the self-centered individual who does not think of others.

"Then, there is the person with feelings of inferiority and inadequacy who identifies with his car as a power symbol. Thus, the car becomes the instrument by which this person expresses his feelings of frustration and anger. This individual operates his car at excessive speed and frequently loses control of his car.

"The third category involves an individual who is depressed and who consciously or unconsciously uses his car as a means of self-destruction—a suicidal implement.

"There is the problem of high speed hypnosis. This is an inherent, built-in booby trap, an ever-present danger when a person drives alone and does not use common sense and good judgment by taking a periodic rest stop, coffee breaks, etc."

If the above are rough analyses, keep in mind that the problem is so serious that it has become an emergency; soft words just won't do.

City Of Detroit Buys Up Former Skid Row Areas

DETROIT (AP) — Mayor Jerome Cavanagh Wednesday approved a contract for the purchase of 23 acres of land for development of a \$55 million International Village.

The land in the former skid row area will cost \$3,236,000 and will be paid for over a five-year period.

Walter Shamie, president of the International Village Corporation, said work on the project will start within 12 months. The city will be paid \$80,000 a year in taxes.

Actress To Live In New Mexico

HOLLYWOOD (AP) — Actress Anne Baxter and her husband, Australian rancher Randolph Galt, are buying a New Mexico ranch, their spokesman in Hollywood said.

The couple has been living most of the time on Galt's 37,000-acre ranch north of Sydney.

Said the spokesman: "Anne has taken time out to have a family and now she wants to reactivate her career. But it's too expensive to commute between Australia and Hollywood."

Living Costs At Record High

WASHINGTON (AP) — Living costs in June rose four-tenths of one per cent to a record high, the Labor Department reported Friday.

The rise was the highest for a single month since September of last year when an increase of six-tenths of one per cent was recorded.

The June index at 106.6 compared to the 100 base for 1957-59, and was 1.2 per cent above last year.

The figures mean it cost \$10.66 to buy in June the same living cost items which could be bought for \$10 in the 1957-59 period.

Arnold Chase, assistant commissioner for prices and living conditions in the Bureau of Labor Statistics, said the June increase was due primarily to higher prices for food, housing and medical care.

In addition, sales taxes were increased in several cities.

Sharply higher sugar prices were a major cause of an advance in average food prices in June. Sugar prices rose by 32 per cent and were 44 per cent above a year earlier.

On the whole, food prices averaged 1.4 per cent higher than a year ago. Restaurant meals were 2.2 per cent higher.

Judge Starr Heads Board At Ferris For His 14th Term

BIG RAPIDS (AP) — Senior U.S. District Court Judge Raymond W. Starr of Grand Rapids was re-elected Friday to his 14th successive term as chairman of the Ferris State College Board of Control.

Two other long-term incumbents also were returned to their posts. They are Lawrence W. Pratkan, Ann Arbor publisher as vice chairman and Charles E. Fairman, Big Rapids businessman as secretary.

Dr. Glenn C. Bond, Upjohn Co. executive, was named to succeed Mrs. Bess E. Fishman of Grand Rapids as treasurer of the Ferris board.

Canadian Firm To Build New Ore Pelletizing Plant

PITTSBURGH (AP) — Dravo Corp. said Thursday its Canadian subsidiary will build a new iron ore pelletizing plant at Pointe Noire, Quebec, in northeastern Canada for Wabash Mines.

The announcement said Dravo of Canada Limited will design, fabricate and erect the plant to the specifications of Pickands Mathers & Co., Cleveland, managing agent for Wabash Mines.

The plant, Dravo said, is expected to cost in excess of \$30 million and is scheduled for completion in 1965.

DAZZLING SIGHT
COLUMBUS, Ohio (AP) — It looked like a million dollars — and it was. That's how much money was on view in a well-guarded glass case at the Buckeye Federal Savings and Loan Co.

The display was arranged as part of the company's celebration of a milestone — surpassing \$100 million in assets.

Ann Landers

Change Director

Dear Ann: May I have the last word in regard to the unfortunate girl who complained because she had a shape like an ironing board?

You told her to go to the lingerie store and buy what she needed. I thought your advice was top-notch but one reader wrote to say store-bought curves are dishonest and that such fakery is symbolic of the decay of American integrity.

May I tell you what happened when I was a ninth grade student, back in 1908? In those days the teachers wore white shirt-waists and form-fitting, ankle-length skirts. Our history teacher, Miss Smith, was tall and slender with no hips at all, poor thing. Her long, straight skirts made her look seven feet tall.

One day she appeared in class with a beautiful figure. I was dying of curiosity—and being ten years old I hadn't yet learned it was impolite to ask personal any personal questions. So I asked, "This is what she said, 'I made myself some hip-pads which I tie around my waist. What God has forgotten I made up with cotton.'"

So, you see, there's nothing new about it—SEA WILLOW.

Dear Ann Landers: We are in our early 50's and this is the second marriage for us both. I've always held a responsible job and managed my money affairs well. When Leonard was widowed ten years ago he turned over his financial matters to his eldest daughter. His wife had always managed the money so his eldest daughter took over where her mother had left off. Leonard handed over his pay check to her and she paid all the bills and gave him an allowance.

We've now been married four months and Leonard's daughter is still paying his bills and giving him an allowance.

I am very uncomfortable about this but don't know what to do. We are getting along fine and I don't want to rock the boat. Still this is like a bone in my throat.

Should I say nothing and hope in time he will offer to let me handle the family finances—or what?—NUMBER TWO

Daer Two: Don't stand on one foot while you're waiting, Lady. It may be a very long wait—like maybe forever.

When Leonard had no wife, it was all right for his daughter to pinch hit, but now that he has a wife, the pinch hitter should be benched.

Dear Ann Landers: Please print this for all girls who are going steady and are afraid to break up. I went steady with Bart for a year. He was selfish and inconsiderate and I was miserable most of the time but I thought that was the way love was supposed to be. One day I realized we were fighting all the time so I told him we'd better call it quits. He agreed but asked if we could date once in a while.

Three weeks went by and he didn't call. I was heartbroken. I regretted the break-up and came

close to calling him and admitting it. But somehow I controlled myself.

Then I met Earle. After one date I knew what it was like to be treated like a lady. Earle was everything that Bart wasn't. Last night we ran into Bart at a party and for the first time I saw how crude, arrogant and phony he is. Now I could kick myself for being so dumb and wasting a whole year on him. Please pass the word.—HAPPIER NOW

Dear Happier: Hooryay for you. You were like that worm in the horseradish who thought it was the sweetest place in the world because it was the only place he'd ever been. (P. S. Students, take note.)

Planning a wedding? Leave nothing to chance. ANN LANDERS' newest booklet, "The Bride's Guide," has all the an-

swers (from announcing the engagement to "who pays for what"). To receive your copy, write to Ann Landers, in care of this newspaper, enclosing a long, self-addressed, stamped envelope and 35c in coin.

Ann Landers will be glad to help you with your problems. Send them to her in care of this newspaper enclosing a stamped, self-addressed envelope.

Judith Spricks Becomes Paul Sidbeck's Bride

Miss Judith Ann Spricks became the bride of Paul Sidbeck at 10 a.m. today at St. Charles Borromeo Church in Rapid River. Rev. John Vincent Suhr officiated at the single ring ceremony.

Parents of the bride couple are Mr. and Mrs. Elden Spricks of Rapid River and the Elmer Sidbecks of Gladstone.

Honor attendants for the couple were Miss Helen Young, the bride's cousin and Karl Zimmer, Randy Steinhausen and Thomas Spricks seated the guests.

The bride chose a gown of white Chantilly lace over satin. It featured a floor length bouffant skirt, fitted bodice, cap sleeves of lace, and a sweetheart neckline. Her shoulder length veil of silk illusion was caught to a crown of seed pearls.

Miss Young wore a dress of silk organza with white accessories.

For her daughter's wedding, Mrs. Spricks chose a beige dress with green and yellow print and beige accessories. The bridegroom's mother wore white accessories with her dress of white with blue nylon.

Following the reception for family and friends the newlyweds will leave for a trip to Rockford, Ill., where they will make their home.

The bride is a graduate of Rapid River High School, her husband graduated from Gladstone High School.

Bark River

Fire Chief and Mrs. John Rodgers of Monroe, Mich., were guests of Fire Chief and Mrs. Herman Palmgren for the past week. The two couples visited the lake, and a sweetheart neckline. Arnold Palmgrens in Ironwood, Mich. The couples parted at Moss Lake near Nahma with the Rodgers heading south for Monroe and the Palmgrens heading west. They returned here Tuesday evening.

Birth

Mr. and Mrs. Ernest F. Krause received word of the birth of a daughter, Sherli, Lynn, to Mr. and Mrs. Gerald LaHaie of Paramount, Calif., Tuesday, July 16. Sherli, who has a brother, Keith, weighed seven pounds six ounces at birth. Mrs. LaHaie is the former Luanne Krause daughter of the E. F. Krauses.

Reginald Rockmans Will Celebrate Silver Anniversary

Mr. and Mrs. Reginald Rockman, 1306 11th Ave. S., will celebrate their 25th Wedding Anniversary at Gillett Park, Gillett, Wis. on Sunday in conjunction with a cousin's reunion the same day.

Mr. and Mrs. Rockman were married July 28, 1938 at the Lutheran Church on 52nd and Capitol Drive, Milwaukee by the Rev. John H. Baumgaertner. In Escanaba they are members of Immanuel Lutheran Church.

The couple moved to Escanaba in 1948 from Stevens Point, Wis. Mr. Rockman is employed by Central Greyhound Lines. They have two children, Sally in Milwaukee and Thomas, a student at Escanaba Area Senior High School.

Bridge Luncheon At Country Club On Wednesday

The regular bridge luncheon will be held Wednesday, July 31 at the Escanaba Country Club. The affair is for members and guests and will begin at 1 p.m.

Reservations must be made by Tuesday noon by calling the club, ST 6-1701.

Hostesses of the day are Mrs. N. L. Lindquist, chairman, Mrs. Sulo Leppanen and Mrs. Richard Lahay.

Mrs. Garland J. Lavigne (Mincoff Photo)

Barbara Pelletier, Bride Of Garland J. LaVigne

Marriage vows were spoken by Barbara Jean Pelletier and Garland Joseph LaVigne at St. John the Baptist Church of Garden today. The 11 a.m. double ring ceremony was solemnized by the Rev. Conrad Dishaw.

Best man was Terry LaVigne of Isabella, cousin of the bridegroom. David Pelletier of Garden, brother of the bride was groomsmen. Seating guests were Lawrence M. Bault and Ralph Wolfe.

Reception for 29 was held at the Bayhouse Restaurant. A reception for 300 guests and a dance will be held at the Isabella Hall.

Following a wedding trip to the eastern part of the U.P. and Soo, Canada the couple will make their home in Kalamazoo. The bride is a graduate of Garden High School and the bridegroom was graduated from Garden High School.

The bride, given in marriage by her father, wore a floor-length gown of beau de soie, with sweetheart neckline forming a V back. The high midriff waist with flower appliques featured a front panel of appliques to the hemline. The plain front with knife pleats on hips formed a bustled bow in the back draping into a chapel train. The gown featured long tight-fitting sleeves. Her finger-tip veil was held to a crown of crystals and pearls. The bridal bouquet was of white cushioned mums and yellow roses. The bride placed a bouquet at the altar of the Blessed Virgin Mary while Miss Guertin sang.

The attendants wore identical bell shaped aqua silk organza over taffeta gowns with matching headpieces. They carried cascading bouquets of yellow and white carnations. Mrs. Pelletier chose for her daughter's wedding, a rose linen sheath with white accessories. The bridegroom's mother wore a beige lace sheath with beige and brown accessories.

MANISTIQUE

Mary Jane Smith And Milton Johnston Wed

Mary Jane Smith and Milton Johnston were united in marriage at 10 a.m. today at St. Francis de Sales Church with the Rev. Terrence Donnelly officiating at the double ring ceremony.

The parents are Mrs. Joanne Smith of Kenai, Alaska and Mr. Eugene Johnston, 621 Arbutus Ave. Attending the couple were Sally Gardapee as maid of honor and Robert Wood as bestman.

Seating guests were Glen and Myron Johnston, brothers of the bridegroom.

The bride's floor length gown was fashioned of chantilly lace, with sequins and swedish pearls adorning the scalloped neckline, and fingertip sleeves. Her crown of swedish pearls and crystals held the fingertip veil in place and her flowers were red roses surrounded by white mums on a prayer book.

The maid of honor chose a pink nylon over satin dress with sequins and pearls and pink accessories. Her circular headpiece featured a pink veil and she carried pink and white miniature mums.

A reception is being held at the home of the bridegroom. For a wedding trip of undisclosed destination, the bride is wearing a peach cuponi dress featuring a cummerbund and three-quarter length sleeve jacket with a red rose corsage.

Both are graduates of Manistique High School and will make their home here. The bridegroom is employed with the Manistique Tool and Manufacturing Co.

The Manistique harbor was the scene of considerable use Thursday night.

There were the Coast Guard cutter Sundew, placing bouys; the T509, former Army boat being used by the U.S. Public Health Service in its lakes study; and a seaplane which brought the owner and a Mackinac City businessman, George Stenokoskie here on insurance business.

In addition the Army Corps of Engineers dredge was in the harbor, the car ferry was unloading a long string of railroad cars, two yachts and numerous fishing boats were here.

The survey boat, with six men in the science team and three in the crew left early Friday for Frankfort in its trip around the lake. It was at the Straits of Mackinac earlier.

Findings of the chemical and biological study of the lake water and the bottom are scheduled to be published next year, Dave Kennedy, who is in charge reported. All of the Great Lakes and the St. Lawrence are eventually to be studied. Maximum depth in the Lake Michigan study has been 825 feet, according to Capt. Robert Brose, German-born skipper who began work on the lakes at the age of 15, in 1926.

The 509 boat being used in the study is like the 109 President Kennedy used in the war. Captain Brose said. The vessel was purchased from the Army last year from mothballs in Charleston, N.C. The boat had been used to provision other ships at sea.

Briefly Told

Mrs. Jacob Weber was taken by ambulance to Schoolcraft Memorial Hospital at 8:45 a.m., Friday.

The final M.H.S. class of 1953 reunion meeting is scheduled Monday at 8 p.m. at the Sportsman's Club.

The regular monthly meeting of the Manistique Recreation Commission will be held Wednesday at 5:00 p.m. in the Manistique Public Library. City Manager Gesko will be present.

An important meeting of all Lancer Drum and Bugle Corps and their parents has been called for 7:00 p.m. Monday, July 29 at the Youth Center to discuss discipline, directors and forthcoming appearances.

Hospital

Admitted to Schoolcraft Memorial Hospital were Hazel Davenport, Naubinway, Bessie F. Mitchell, Rte. 1 and Hilda Klobucher, Engadine. Discharged were Pauline Webb, Lottie Belouneau, Gertrude Webb, Michael LeBrasseur, Loretta Jones, Marie Halvorsen and Mary Hill.

Resource Workshop Starting Monday

The teachers Community resources Workshop, to be directed by Arnold E. Thomas of Bay City opens here at 8 a.m. Monday in Manistique High School.

Registrations are still being accepted for the course, to acquaint teachers with local resources, places and people and help utilize the material in classrooms.

The course arranged by Northern Michigan and Michigan State universities. Credit from either of the schools may be earned.

School Board Plans Interviews

The Manistique School Board of Education plans interviews Monday with one, possibly two applicants for the post of school superintendent, Robert Orr, board president reports. The board met this week to review applications, which totaled 35.

In This Corner

with BILL FINLAN
(pinchhitting for vacationing Ray Crandall)

Richard "Red" Lacouisiere, coach of the American Legion Menominee Beavers, has found himself in a frustrating predicament during the past years. Red has had unlimited success with his teams since he started coaching eleven years ago, except, that is, with the Escanaba Cubs. Red noted this week that the 5-4 victory, his team managed with two out in the last of the ninth in the first of the three-game series for the District 11 championship, was the first time he has taken home a victory from the Escanaba home ballpark.

Lacouisiere's teams have gone into the finals of the American Legion tournaments nearly every year, only to find themselves second best after meeting up with the Cubs. The Cubs have taken the District Championship nine years straight. Menominee went downstate in 1950 after they beat Escanaba at Munising in the tourney, and then downed Manistique for the title.

Red claims that this is the best team he has ever fielded. It is well balanced from the fielding end and the pitching has been top notch. Their 111 runs in 11 games speaks for their hitting power.

As far as the Cubs are concerned, Lacouisiere said they have an excellent defensive team. They have players who have been with the championship squad five years, and they have several players this year who are newcomers, but they played excellently. He said things don't look any brighter for the future for him with young players like Wally Schultz, Bob Johnson and Frank Trotter on the squad. Lacouisiere said he will always expect stiff competition from Escanaba as long as coach Al Ness is with the Cubs.

Bill Eik Jr., who will be a senior at Escanaba Senior High this fall, went along to the Canadian Soo a week ago to take care of the caddy chores for Sally Fontaine who was competing in the U. P. Women's tourney there. Bill had a chance to play nine holes during his time off. He sailed through the nine holes with a blistering 33, one stroke over the course record. This was the first time he had set foot on the course. Bill was the first man on Escanaba High's golf squad this spring.

Casey's N Y Mets Drop 20th In Row

HOUSTON (AP)—Casey Stengel's Mets set a modern league record Friday night, topping by one the former mark of 19 road losses set by the Philadelphia Athletics in 1916.

The Mets' 20th road defeat was a 7-3 clobbering by Bob Aspromonte and the rest of the Houston Colts.

"It's a bad record, isn't it," the 73-year-old Stengel bellowed. "Then why should I talk about it?"

But, the Mets' manager quickly added:

"What am I supposed to do, fire all my men? Show me where I can get other players for \$25,000 or \$50,000 and I'll buy them. But you can't get those fellows."

"I have only nine pitchers and they're overworked. Wherever possible, I have to let them pitch a full game and that only tires them more. Right now two of them are hurt, so we're operating with seven."

"Take San Francisco. They have 11 and they don't work them full games. As soon as a fellow is in trouble, he gets help. So they're all nice and rested. You would think they would give up one of their men. But they won't."

The Colts took off quickly at Mets' starter Tracy Stallard and scored all their runs in the first inning, highlighted by Aspromonte's grand slammer.

That irritated Casey all the more.

"Most of our pitchers are experienced men and you would think they know how to get past the first inning," he said. "But this has been happening right along. And this time it was against bad hitters."

"This Stallard had trouble with his control. Then when he got the ball over the plate, Aspromonte hit it over the roof."

"Our infield has been loose and the outfield isn't too good either. But don't ask me to talk about any records. Not when they're the bad kind."

Bizeau, Jacobs And Ogle Dunked In Hayward Tourney

HAYWARD, Wis. (AP) — Two Washington state men and a Canadian dumped three Upper Peninsula Michigan men in the opening round Friday of the National Log Rolling Championships.

Jim Ogle of Marquette, runner-up last year, lost to Jerry Phillips of Clarkston, Wash. Don Jacobs of Escanaba was dumped by John Wickheim of Bremerton, Wash., and Bob Bizeau of Gladstone was dunked by Bill Syr of Blind River, Ont.

Tourney Stalls Waubung Action; Escanaba Leads

Action will resume Sunday in the Waubung League with Manistique playing at Escanaba, providing the Zone 5 Upper Peninsula American Legion Tournament is finished today in Menominee.

If Marquette or Escanaba swept the first two games for the championship, the Cubs will host Manistique at the Al Ness Field.

The Menominee and Powers teams were scheduled to play at Powers but the game has been postponed because of the Upper Peninsula tournament at Menominee. Menominee's coach, Red Lacouisiere is conducting the tourney.

Gladstone is open this weekend.

Lemmer No. 2 Leads Beginners League; Schedule Posted

Lemmer No. 2 continues to set the pace in the Beginners League and the Kool Kats lead the National division after the first month of play in the recreation baseball program. The Mets lead the American League.

The newly organized Twisters upset the Hurricanes in the game of the week at Royce Park on Tuesday and the Kool Kats edged the Cubs at Webster Park on Wednesday. Stan LeMay's home run in the last inning broke a 3 to 3 tie and gave the tigers a 4 to 3 win over the Cardinals in Thursday's headliner.

The standings:

Team	W	L
Lemmer No. 2	7	0
St. Thomas No. 1	6	1
Franklin	4	2
Lemmer No. 3	4	2
Lemmer No. 1	4	2

Yankees	0	1
Syndicate	0	1
Cardinals	0	1

Team	W	L
Kool Kats	4	0
Hurricanes	4	1
Yankees	3	2
Tigers	2	2
Syndicate	1	3
Twisters	1	4
Cardinals	1	4

The schedule:

Monday - St. Thomas No. 1 vs. St. Joe No. 1 at 9; Jefferson No. 2 vs. St. Thomas No. 2 at 10; Jefferson No. 1 vs. St. Joe No. 2 at 11; Tigers vs. Hurricanes at 1; Kool Kats vs. Yankees at 2:15.

Tuesday - St. Anne vs. Webster No. 2 at 9; Lemmer No. 2 vs. Lemmer No. 3 at 10; Instructions for 7 and 8 year old beginners at 11; Mets vs. Yankees at Babe Ruth Field at 1; Twisters vs. Cardinals at Royce at 2:30.

Wednesday - St. Anne vs. St. Joe No. 1 at 9; Franklin vs. St. Pat No. 2 at 10; Jefferson No. 1 vs. Webster No. 2 at Webster at 1; St. Thomas No. 1 vs. St. Thomas No. 2 at Webster at 2; Cardinals vs. Cubs at Webster at 3.

Thursday - St. Joe No. 2 vs. St. Pat No. 2 at 9; Lemmer No. 1 vs. Lemmer No. 3 at 10; Instructions for 9 and 10 year old beginners at 11; Tigers vs. Twisters at 1.

Friday - Jefferson No. 2 vs. Webster No. 1 at 9; St. Pat No. 1 vs. Franklin at 10; Instructions for 7 and 8 year old beginners at 11; Kool Kats vs. Hurricanes at 1.

LA Angels To Sign Firey Jim Piersall

BOSTON (AP)—Outfielder Jimmie Piersall, released by the nose-diving New York Mets, was expected to sign with the Los Angeles Angels of the American League as a free agent today.

A source close to the Angels said no trouble was anticipated with Piersall over contract terms. The Associated Press learned Friday night that the colorful 33-year-old fly chaser was going to the Angels. But because of the fact the waivers didn't run out on Jim until noon today neither Piersall nor Los Angeles Manager Bill Rigney was free to announce the move.

Most noted this season for running out his lone homer backwards, Piersall hit 194 for the Mets and drove in only two runs in more than 40 games.

Western Open—Arnold Palmer, left and Jack Nicklaus are shown talking over the tools of their trade at Chicago's Beverly Country Club where the 60th Western Open golf tourney is being played. (NEA Telephoto)

Orioles In Second; Down Chi Sox 6-0

By JIM HACKLEMAN

Associated Press Sports Writer.
Five short weeks ago Billy Hitchcock's job as Baltimore Orioles manager seemed in jeopardy. The club had plummeted from the top to sixth place in the American League within 10 days. Reports of disension were bandied. Hitchcock was criticized as having lost control of the team and making all the wrong moves.

But the Orioles began to fly high in July. Their latest winning string reached four games Friday night when they blanked the Chicago White Sox 6-0 behind Milt Pappas' three-hit pitching, and they've climbed into second place—the

highest they've been since June 10.

New York's injury-ridden but victory-prone Yankees maintained their commanding eight-game lead by clipping Minnesota 6-5 with the help of two unearned runs and neat relief pitching by Steve Hamilton.

Boston ended a losing string at four games, beating the Los Angeles Angels 5-4 with a three-run sixth inning.

Ken Retzer's two-run homer in the seventh carried Washington over Detroit 3-1, snapping a run of five Senator losses.

Cleveland trimmed Kansas City 3-2, scoring the deciding run in the seventh inning on Moe Drabowsky's wild pitch.

In the National League, Philadelphia shaded the Los Angeles Dodgers 6-5. St. Louis downed the Chicago Cubs 4-1. San Francisco beat Pittsburgh 6-4. Cincinnati battered Milwaukee 11-1 and Houston clouted New York 7-3 for the Mets' 20th straight defeat on the road, a major league record.

Pappas, who owns an 11-3 lifetime mark against Chicago, checked the White Sox on three singles and got home run support from Boog Powell and John Orsino.

Hamilton saved Jim Bouton's 13th victory by retiring the last two batters in the ninth inning after the Twins had moved to within a run of the Yanks on a double by Earl Battey and John Gory's homer. Hector Lopez, who had three hits, hit a homer with one on in the second.

Twins third baseman Rich Rollins was taken to a hospital for observation after being struck on the head by Lopez' hard grounder in the fourth, outfielder-catcher John Blanchard became the Yanks' latest casualty th a bronchial infection that put him in the hospital.

Lions Work Out In 92-Degree Heat

BLOOMFIELD HILLS (AP) — The Detroit Lions roared through two workouts Friday, scrimmaging for 20 minutes in 92-degree heat while wearing full pads.

Coach George Wilson cut short both the morning and afternoon drills because of the intense heat. But he said he thought the high temperatures will help round the squad into condition quicker by sweating off extra poundage.

More than 20 National Football League veterans were on hand for the double workouts at the Lions' rookie camp. The rest of the veterans are due to report Sunday.

Lary Lose 3-1

By JERRY GREEN
Associated Press Sports Writer
DETROIT (AP) — The Tigers are struggling without headway to rid themselves of ninth place and Gil Hodges feels they can do it—by going down, not up.

Hodges is the only manager in the American League who covets the position the Tigers have held so long. The new skipper of the last-place Washington Senators was the winner Friday night in the opener of what he considers a crucial four-game series.

The Senators liked the Tigers and Frank Lary 3-1 and closed the gap between ninth and 10th to 7½ games. Hodges was full of optimism afterwards.

"Certainly, we can catch Detroit if our good pitching keeps up," said Hodges, who's now two-for-two in his personal rivalry with his old boss in Brooklyn, Charlie Dressen. "This is a big series for us, there's no question about it. I've told my players this is it, right here this weekend. It's the opportunity to move up. Maybe we can even move up a notch farther than ninth."

The danger of falling instead of climbing is new for the Tigers.

Soo Trims IM 2-0

Esky Little Leaguers Battle With Superior

The Escanaba Jaycee Little Leaguers waded into Ashland pitcher, B. Foris, in the first inning yesterday afternoon and banged out four straight hits for three runs and sailed on to victory in their first game of the District Tournament in Escanaba. Escanaba didn't score another run after the first four batters were up in the game, but they didn't need any as Steve Miketinac held Ashland in check with only two hits and one unearned run in the game.

Miketinac fanned ten batters in the six-inning game, and walked only the first batter. The two hits were allowed to Hogan in the third, a double and Chody in the fourth, a lead-off single. Chody scored on an error, a stolen base and a wild pitch for the only Ashland run of the game.

Robert Stumm started the game for Escanaba by banging out a two-bagger on the first pitch, Roger Chylek followed suit as did Danny Mylander, and Greg Johnson, with singles. Steve Miketinac made the first out of the game, but it was one that had the Ashland team worried until the out was made. Miketinac poked the second out pitch a "country mile" into center field. The Ashland center fielder faded to his right, leaned over the home-run fence, and waited for the ball to come down. He made the catch. It would easily have been a homer if he hadn't grabbed it.

Escanaba didn't get another hit until the fourth when Ralph Kivela slapped a single into the outfield. He was picked off on the next play on a fielder's choice. Danny Mylander got his second

base knock of the game in the fifth, ending the hitting for Escanaba.

The Escanaba team faces the Superior Nationals in championship action at the Little League diamond at 2 p.m. today.

The consolation game between the Iron Mountain and Ashland teams will follow the championship game.

Pitcher Bob Gibson Hot For St. Louis

By JOE REICHLER

Associated Press Sports Writer
Shout the praises of Sandy Koufax. Sing paeans for Warren Spahn. Make a case for Juan Marichal.

But don't ignore Bob Gibson when it comes time to cast your vote for National League pitcher of the year.

Gibson doesn't have the glittering record of Koufax or Marichal posted his fifth straight victory Friday as the Cardinals defeated the Chicago Cubs 4-1 and closed to within five games of the first-place Los Angeles Dodgers, who dropped a 6-5 decision to Philadelphia.

It was Gibson's 11th victory in his last 12 decisions. He hasn't lost since May 19, when Cincinnati beat him 10-6. His season record is 12-4.

San Francisco's third-place Giants also gained on the Dodgers with a 6-4 triumph over Pittsburgh. The Giants' fifth straight triumph advanced them to within 6½ games of the top. Cincinnati's Reds shellacked Milwaukee 11-1 and moved past the Cubs into fourth place, 7½ games off the pace.

Houston inflicted the 20th straight road defeat on New York's cellar-dwelling Mets, 7-3. The loss gave the Mets undisputed possession of the modern major league record. They had been tied with the 1916 Philadelphia Athletics at 19 road losses each.

The New York Yankees maintained their eight-game lead in the American League with a 6-5 victory of the Minnesota Twins. Baltimore snapped its second-place tie with Chicago by beating the White Sox 6-0. Boston edged

DiMaggio Stars In Exhibition

BALTIMORE (AP) — For Joe DiMaggio, even Yankee-hating Baltimore fans make an exception.

The famous New York Yankee outfielder, who retired before the Baltimore Orioles returned to the American League in 1954, was clearly the show stopper Friday night during a two inning re-enactment of the 1938 All-Star baseball game.

Responding to the cheers of 23,618 fans, DiMag rapped out a single with his classic swing and reached base with his typical loping gait.

The hit was one of two made by the American Leaguers off pitcher Johnny Vander Meer. The National League batters connected for five hits off Lefty Gomez and managed to send one run home in the first inning for a 1-0 victory.

DiMaggio registered a complaint with Joe Cronin, a member of the 1938 All-Star team who is now American League president.

Pointing out that most of the oldtimers were scheduled to play again in New York's Yankee Stadium today, DiMaggio asked if it wasn't against the rules to play a day game after a night game in another city.

"This is an unusual circumstance," Cronin said. "I rule you must play both games."

Pointing out that most of the oldtimers were scheduled to play again in New York's Yankee Stadium today, DiMaggio asked if it wasn't against the rules to play a day game after a night game in another city.

"This is an unusual circumstance," Cronin said. "I rule you must play both games."

Miss Jensen Leads Wolverine Open

MOUNT CLEMENS, MICH. (AP) — Blonde Ruth Jensen of Seattle led the way today into the second round of the 54-hole \$8,000 women's Wolverine Open golf tournament on the strength of a three-under par first round performance.

The West Coast girl rallied from bogies after going into traps on the ninth and 12th holes and, with birdies on three of the last five holes, finished with 36-35-71.

NEWBERRY

Luce Chapter OES Will Entertain Ritue'istic Team

Luce Chapter Order of the Eastern Star will entertain Hillsdale County's 1867 Ritualistic team here on Friday evening, Aug. 2.

Registration will be at 5 p.m., followed by a dinner at 6:30 p.m. in the Community Hall. Advance registrations may be made by calling Mrs. Viola Grant before July 29 at 786-w-2.

The Ritualistic team appearing will be dressed in the period of 1860's and as they were shown at Grand Chapter in October. This is the third year the group has traveled to raise money for the Grand Chapter Scholarship Fund.

Members of neighboring chapters have been invited to attend the program.

The team will parade on Newberry Avenue between 5 and 5:30 p.m. Friday.

Church Services

St. Gregory's (Catholic) Church — Masses, Sundays 7 a.m. and 11 a.m. Weekdays, 8:15 a.m. and 7:00 a.m. Saturdays, Confessions, Saturday, 4 to 5 and 7 to 8 p.m.

First Presbyterian Church — Family worship Sunday 11 a.m. — Pastor Rev. Fred Kolbe.

Messiah Lutheran Church — Sun. 9 a.m. Church School; 10 a.m. Worship Service. — Charles S. Beckingham, pastor.

Trinity English Lutheran (Missouri Synod) — Sunday School, 9:30 a.m. Worship Service, 10:30 a.m. — Allen E. Parks, pastor.

Briefly Told

Two Newberry juveniles, who admitted they set fire to land on M-77 in the hopes they would be hired to help extinguish it, have been turned over to Schoolcraft Probate Court. The fire burned two acres. They admitted the act to State Police.

The Bethlehem-Messiah Lutheran League will have an outing on Sunday. The parents and families of the Leaguers are also invited and each family is to bring their dinner which will be served potluck style. This will be held at the park in Grand Marais and everyone is to meet at the Messiah Lutheran Church at 12 p.m. At 8:30 p.m. on Sunday Lutheran League will have charge of some acquainted mixers for the opening evening of the High School Youth Week at Camp Manakiki.

City Briefs

Mrs. Myrtle Bates of Newport, Ark. is presently visiting her daughter and son-in-law, Mr. and Mrs. Melvin Edwards and their family.

Miss Jean Carr of Grand Rapids is spending a vacation here with Miss Leota Coash.

Word has been received here of the death of Emil DeMarco of Lansing, there recently. Mr. DeMarco had a restaurant on Mich. Ave. in Lansing, and was a frequent visitor here during fishing and hunting seasons.

Mr. and Mrs. R. W. Hild attended funeral services in Marquette on Thursday for Mrs. Sadie Long, Ira Perry, 50, of Eckerman who pleaded guilty in Circuit Court to being charged with uttering and publishing, while on parole, was ordered by the court to be taken to the Newberry State Hospital for psychiatric observation, and will be taken there on Monday, July 29.

There will be a special hearing of the Circuit Court of Luce County here on July 29, with Judge George Baldwin presiding.

Smiling Suspect In Ambush Killing Jokes Over Tests

JACKSON, Miss. (AP) — Byron De La Beckwith, smiling, wisecracking and posing readily for news photographers, entered the state mental hospital at nearby Whitfield Thursday for psychiatric tests.

The court-ordered examinations to determine whether he is competent to stand trial for murder in the June 12 ambush slaying of Negro leader Medgar Evers.

Red China Plans Nuclear Weapons

TOKYO (AP)—A high Chinese Communist official asserted his country will have nuclear weapons "in the not too distant future."

The prediction was made by Kuo Mo-Jo, chairman of the China Peace Committee, in an address at a rally of 10,000 persons in Peking commemorating the 10th anniversary of the Korean armistice signing, the New China news agency said.

The present attempt of a small number of countries to control the destiny of the people of the world by means of monopolizing nuclear weapons will also certainly be smashed in the not too distant future," Kuo Mo-Jo declared.

"We revolutionary people will surely be able to master the new techniques which the imperialists have been able to master."

Western and Japanese officials have predicted that the Chinese would be capable of exploding a nuclear device possibly within the year. But it was believed the first time a responsible Chinese official had given such a strong hint on the subject.

Kuo's statement was obviously Peking's reaction to the limited nuclear test ban signed in Moscow by the Soviet Union, United States and Great Britain.

He gave no details nor exact timetable of when China may develop a nuclear weapon.

Bankers Admit \$38,000 Thefts

DETROIT (AP) — The former auditor and former vice president of the Bank of Commerce of suburban Hamtramck pleaded guilty Friday to total embezzlements of \$38,000.

Although the embezzlements went on more or less simultaneously, neither man knew that the other was cheating.

"The auditor was so busy covering his own thefts that he had no time to check on the vice president's stealing—and vice versa," said U. S. Atty. Lawrence Gubow. James M. Mathes, 47, of Detroit, the ex-auditor, and Herbert A. Schmidt, 57, of Royal Oak, ex-vice-president, entered guilty pleas in U. S. District Court. Judge Talbot Smith deferred sentencing.

Mathes admitted taking money since 1957 from tellers at the rate of \$1,000 or so at a time and juggling the books to cover the losses. He said he told friends who wondered at his source of funds that he had separate income from a potato farm in Colorado.

Gubow said that Mathes, though charged with embezzling only \$27,539, admitted he took a total of \$38,000.

Schmidt admitted defalcations of \$11,125 in personal "loans" to himself in January and February of 1961 and which he covered up with false entries.

Both men were fired by the bank earlier this year when shortages were discovered, Gubow said.

Iodine Suntan Rated Harmless By Dermatologist

CHICAGO—A mixture of baby oil and tincture of iodine is an apparently harmless method for obtaining an artificial suntan, according to Dr. John M. Knox, a Houston dermatologist.

Although the homemade mixture may be used in the belief that it speeds suntanning, the iodine probably acts as a stain, Dr. Knox wrote in the Journal of the American Medical Association.

He said he had observed no ill effects from use of the "home mixture" and there is probably little or no absorption of the iodine through the skin.

"The usual suntan is a response to injury from sunlight and is the body's way of protecting itself from additional injury," Dr. Knox said.

"From a medical standpoint it is safer to use certain types of stains or dyes . . . than to obtain a true suntan. It must be remembered, however, that artificial stains do not provide protection against sunburn upon subsequent exposure to the sun. Such protection is only provided by naturally produced pigmentation."

Linedrive Decks Twin's Rollins

NEW YORK (AP)—Third baseman Rich Rollins of the Minnesota Twins was reported in satisfactory condition in Lenox Hill Hospital today after being struck in the head by a sharp grounder in the fourth inning of Friday night's game at Yankee Stadium.

Rollins was knocked unconscious by a smash off the bat of Hector Lopez which bounced off his left cheekbone and caromed over to second base on a fly. He suffered nothing more than a superficial injury and is under observation. He was batting .309 before the game.

Rollins suffered a broken jaw last April 7 in an exhibition game at Knoxville, Tenn. He missed only three games but was forced to play with a wired jaw for a month.

Rollins has company at Lenox Hill in John Blanchard, power-hitting Yankee catcher-outfielder who was hospitalized with bronchitis Friday and will be sidelined for about a week. As a replacement for Roger Maris, Blanchard hit .327 in 15 games with six home runs and 16 runs batted in. Maris, out since July 7 for rectal surgery, returned to the New York line-up Friday night.

GENTLE ROAN Colored Welch Pony, 5 years old, with new saddle

The Bear Facts:

Better Run Away Than Argue With Bruin About It

This is the season of picnics, fishing trips, berry picking forays into the backwoods — and bear stories.

Some of the incidents are given factual reports and others are stretched a bit in the telling, but there is one thing for certain, says Conservation Officer Hugh Fisher, when you meet a bear in the woods it is better that you go your way and let him go his.

"Encountering a large bear may mean that you are up against a female with cubs," said Fisher. "Usually a bear will take off as fast as you would like to run to get away from there yourself, but a female with cubs is a different animal and unless you retreat you may be in for trouble."

If you should see cubs in the woods, stay away from them, or be prepared for a sudden change of mother bear from her hiding place.

May Be Shot

Owen Bennett, assistant supervisor of the Escanaba District of the Department of Conservation, says that he does not believe the number of bear complaints are more in number this year than last.

"What happens is that one area will be free of bear for a few years and then they will move in, causing damage and complaints. Elsewhere the number of complaints decline," he said.

Michigan law permits residents to shoot bear they find on their property that has done damage or the owner believes may cause damage. But the shooting must be reported to the Department.

George Pepin of Old State Road,

who has a camp at Pole Lake in the Hiawatha National Forest shot and killed a bear recently that had been disturbing the peace and doing malicious damage. Fact is, he killed it with one shot from a .22 caliber rifle.

Camp Raided

Pepin was awakened in the early morning at camp by sounds of a bear outside. He looked out and saw the bear tearing a food cooler to pieces. Pepin got out his rifle and fired one shot. Killing of the bear was reported to the Conservation officers.

Complaints have been coming in to the Department from Pine Ridge, Cornell, Brampton and a few other areas this summer. Mostly people report that they are seeing bear where there were none observed in past years.

"Bear do a lot of traveling," said Officer Fisher. "A bear tagged in the spring at Cusino near the Lake Superior shore was shot that fall in the Powers area in Menominee County." The distance between the two locations is about 75 miles as the crow flies, and bears are known to always take the long way around.

They're Dangerous

Best way to discourage visiting bears is not to leave garbage or other food about for them to eat. Camps with open pit garbage disposals may have bears visit there at night. After a time this acquaintance can lead to contempt for humans on the part of the bear, who becomes annoyed if the handouts fail and begins raiding the camp itself.

Conservation officers are concerned for the safety of children and adults when bears and humans meet, and rightly so.

The records show that bears are potentially dangerous. A child was killed by a bear in Chippewa County a number of years ago, and near Engadine in Mackinac County, more recently an elderly man armed only with a knife successfully fought off an attacking bear.

Crystal Falls School Board To Seek Three Mills

CRYSTAL FALLS — Increasing costs and a decreasing source of revenue have made it necessary for the Crystal Falls board of education to request from the electorate three additional mills on the state equalized valuation for a two-year period—1963 and 1964.

The special millage election has been scheduled by the board for Monday, Aug. 12.

The budget for the 1963-64 school year calls for an expenditure of \$407,154.14, whereas on the basis of known anticipated income, all sources of revenue will produce approximately \$382,491.88 for the coming school year for operation purposes.

The budget increase of \$12,624.61 for 1963-64, Superintendent K. W. Schulze pointed out, is due to salary commitments and increased operational costs. The Crystal Falls public schools has a salary schedule for its teaching employees and the provisions of that salary schedule must be met, he explained.

There have been adjustments for non-teaching personnel. While the budgetary costs have increased by more than \$12,000, anticipated income has been reduced by \$10,498.12.

Last year's income fell \$1,540.53 short of meeting the needs of the budget. The total needs, Schulze said, over and above income which is anticipated at this time, is \$24,662.26.

Dairy Day To Mark Centennial At Menominee

MENOMINEE — The 1963 Menominee County Centennial celebration will be officially launched on Saturday, Aug. 3 with the annual Menominee County Dairy Day livestock show and picnic at Shaker Lakes Park.

Dairy Day this year, will be "Kickoff Day" for the Centennial celebration which will continue through Sunday Aug. 11.

A record attendance at the Shaker Lakes Park event is expected because of the added stage shows. Culbert-Swan Productions, which is handling the entire Centennial promotion, will provide for the extra features for the afternoon Dairy Day program.

SUMMER DRIVING TIP

NEW YORK (AP) — A "space cushion" is a courteous driving habit for the highway motorist seeking to avert the "tailgating" type collision. This means maintaining a safe interval of at least one car length for every 10 miles per hour of speed. Also, there should be no more than 2½ inches of play (on foreign cars and compacts—2 inches) between the brake pedal before and after pushing to the floor.

Hjalmer (Hal) Nelson, left, associate editor of the Rockford, Ill. Morning Star, and Frank Whiston, famed Chicago realtor and member of the Chicago board of education, are two distinguished Escanabans. Here they are exchanging reminiscences on the "old home town" at the Swedish Engineers Club in Chicago on the occasion of Escanaba Centennial Night there last spring. (Daily Press Photo)

Be Like Escanaba, Editor Counsels Rockford, Ill.

The following article published in the Saturday, July 13 issue of the Rockford, Ill. Morning Star is by Hjalmer Nelson, an honor graduate of Escanaba High School with the Class of 1923, who attended his class' 40th reunion in Escanaba recently.

By HAL NELSON
Associate Editor

Rockford—A prosperous, fast-growing community listed among the 100 largest cities in the nation with a high per capita income—rating—can take a lesson in civic pride and willingness to accept community responsibilities from our one-time home town of Escanaba, Mich.

In recent years, the run-down lake-front area in Escanaba has been transformed into a place of beauty through an urban renewal program which included cooperation of labor unions in erecting a building to house the Escanaba Chamber of Commerce. The Escanaba accomplishments puts Rockford to shame for our dawdling with downtown renewal and fringe improvements.

A major feature of the Escanaba Centennial celebration was dedication of a new high school costing more than \$3 million.

It puzzled us that this far-from-wealthy community with a population of just slightly more than 15,000 could afford such an expensive high school. The new school's 174,000 square feet makes it the largest high school in the Upper Peninsula of Michigan. And we would say that the structure compares very favorably in every way with Rockford's two newest high schools—Auburn and Guilford.

The first step was taken three years ago when an Escanaba Area School District was created through the merger of three townships with the city school district. But even so the total student enrollment in all grades is only 4,131, of which 740 are in the 10th, 11th and 12th grades.

Voters approved a \$2,800,000 bond issue. There apparently never was any question but that approval would be forthcoming.

First students attended classes in the new building last April. Next September the enrollment will climb to an estimated 1,100 when ninth grade students are shifted from the junior high school to the new school, which will then become a four-year high school.

But the new high school probably won't reach its 1,500 capacity for years to come.

What is to be done with the old senior high school building, erected in 1907 and remodeled in 1917?

It is being transformed into Bay De Noc Community College and will open its doors in September to provide post-high school educational opportunities for youngsters who otherwise could not afford to go to college.

The new area high school and the community college are examples of the determination of people in this area to provide the best education possible for their children. This determination that first-rate educational opportunities be available has long been a driving force in Escanaba among people in all income groups.

the new high school and the community college possible.

John Lemmer, who served the Escanaba school system for almost 40 years, before retiring as superintendent in 1959, pointed out that "Escanaba is unique in the nation in the bequests its schools have received from the friends of children and believers in a strong education system."

First bequests were comparatively small and went for scholarships. Then Mrs. William Oliver made a \$25,000 gift in the memory of her husband and the money provided the nucleus for the construction of the 1,100 seat junior high school auditorium.

The student district was a major legatee in the estate of Mrs. Catherine Bonifas. During her lifetime she gave the schools more

New Chemical Helps To Keep Vegetables Fresh

Consumers and scientists agree that a new chemical compound gives them fresher, greener and tastier vegetables, the Cooperative Extension Service reports.

The chemical — with the jaw-breaking name N6-benzyladenine (trade-marked Verdant) — has been given overwhelming approval in consumer preference tests conducted by Michigan State University scientists. Both flavor and appearance of Verdant-treated broccoli and celery were rated very highly by panelists.

R. R. Dedolph and S. H. Wittwer, MSU horticulturists, and H. E. Larzler, agricultural economist who conducted the tests, report that the treated celery was preferred over untreated by some 80 per cent of the panel members. About 96 per cent of the consumers preferred the fresher treated broccoli over the untreated kinds.

When the broccoli was cooked, 80 per cent of the panel members could distinguish between the treated and untreated samples. Of this 80 per cent, two out of three preferred the chemically treated samples.

The scientists explain that Verdant inhibits aging by reducing respiration and retarding the protein and chlorophyll breakdown in the leaf tissue. Vegetables stay fresher, crisper, juicier and greener at any storage temperature.

Briefly Told

There will be a mass offering at Holy Cross Cemetery Chapel at 7:30 p. m. Monday, July 29.

Escanaba police have issued traffic court summons to Anthony H. Vandermissen, Wilson Rte. 1, failing to yield the right of way; Thomas R. Hanley, Escanaba Rte. 1, excessive horn tooting; Blaine R. Dickson, 1713 8th Ave. S., and James R. Bonifas, 607 Lake Shore Drive, defective muffler.

U.P. Will Oppose Flight Suspension

Escanaba City Manager George Harvey is organizing an August meeting in Escanaba for communities and agencies protesting the proposal of North Central Airlines that the Civil Aeronautics Board authorize discontinuance of its inter-peninsula flights.

North Central now serves the peninsulas of Michigan with connecting flights by way of Green Bay, Wis., and offers one round-trip flight each day on its aerial bridge between Traverse City and Escanaba, and flights between Sault Ste. Marie and the Lower Peninsula. The aerial bridge flight originates in the morning in

Detroit, goes to Marquette by way of stops at Port Huron, Saginaw, Traverse City and Escanaba, and returns the same way.

If this flight were cancelled as North Central proposes because it has not been heavily used and it correspondingly heavily subsidized, inter-peninsula travelers from the central and western U.P. could go downstate only by way of Green Bay.

The aerial bridge flight between Escanaba and Traverse City was proposed in the Great Lakes local service study of CAB several years ago and is now half way in a 5-year trial. Upper Peninsula cities which want a buildup of transportation services between the two peninsulas of Michigan protest that as now routed the aerial bridge flights do not serve the Upper Peninsula's prime interests downstate, which are direct connections with Lansing and Detroit.

Escanaba and Marquette have filed objections to North Central's proposal with CAB and so have Traverse City, Saginaw and the Michigan Department of Aeronautics.

The strategy meeting planned for Escanaba, said Harvey will invite representatives of the tourist and resort industry, business, the military and other elements concerned with U.P. transportation.

Kennedy Awaits Moscow Report

HYANNIS PORT, Mass. (AP)—President Kennedy was to get a report today from W. Averell Harriman which might provide clues on whether the Soviet Union is in a mood for further easing of cold war tensions.

Harriman, under secretary of state for political affairs, was chief U.S. negotiator in the Moscow conference which led to agreement on a partial ban of nuclear weapons tests.

Harriman was flying direct from Moscow, with a brief stop in Copenhagen, and Secretary of State Dean Rusk was flying in from Washington, for a conference at the summer White House on Squaw Island.

Kennedy flew here Friday night from Washington after telling the nation in a radio-television speech the Moscow agreement is "an important first step — a step toward peace — a step toward reason — a step away from war."

Harriman and Soviet Premier Khrushchev held their final meeting in Moscow Friday.

Sir David Ormsby Gore, British ambassador to the United States, was among the passengers on the President's plane. He is Kennedy's weekend guest.

Mrs. Kennedy will observe her 34th birthday Sunday. As is the custom, the White House did not disclose any information about plans for a celebration. But her children, Caroline and John Jr., and a group of nieces and nephews reportedly are preparing to come bearing gifts.

Mrs. Kennedy is staying at Squaw Island while awaiting the birth of her third child within the next few weeks.

Three Bear Hunts With Dogs Planned

MADISON, Wis. — Final plans for running bear with dogs in three experimental hunts this fall will be made at a meeting of the Hunting Regulations Committee of the Wisconsin Conservation Congress at Woodruff July 29-30.

Here is the weekend schedule for the experimental hunts: Crandon area: Sept. 14 and 15. Park Falls area: Sept. 21 and 22. Presque Isle area: Sept. 28 and 29.

Destruction Derby New Auto Fan Fad

FLAT ROCK (AP) — Jeannie Austin looked on happily one night last week as her husband methodically demolished her family car.

She showed no signs of worry as a fender fell off, followed by a piece of undercarriage. She did show great nervousness when the car caught fire.

It was all part of a new fad in auto racing, a so-called Destruction Derby, in which her husband, Jesse Ward Austin, and 50 other drivers took part.

Detroit's senior Traffic Court Judge John D. Watts and a team of 11 researchers from Wayne State University were among the several thousand spectators who watched the mass fender crunching. The researchers have been working on a program, sponsored by Ford Motor Co., to find out what can be done to cut down the number of auto injuries caused by flying glass.

Austin entered a 1954 Ford sedan with 73,000 miles on it. Up until the day of the race, it had been Mrs. Austin's car for the family shopping and other chores.

In the finale, Austin ran into troubles early in the rough bumping. Finally, the battered car caught fire and he swerved into the infield and got out safely. "I only won \$5 tonight, since I didn't finish any heats, and I figure I'll get \$15 for the car at a junkyard, so that means my wife will get only \$20 for her car. I wonder how she will like that?" he mused.

The answer was that Mrs. Austin did not mind a bit—or so she said. "The main thing is that Jesse did not get hurt," she said. Judge Watts, one of the nation's leading authorities on traffic safety, said he was impressed with the derby which operates with only two rules—no head-on collisions and no hitting on the drivers' side. Otherwise, the sky is the limit on how you bump your opponents out of the race. The last car running is the winner.

"I was surprised that so few of the car doors flew open despite the terrific bumping they were taking," said the judge, adding, "also the fact that none of the drivers was injured seriously was a convincing argument for use of safety belts and safety helmets. All the drivers had to wear both items."

Savastano Gets Hole In One

Jim Savastano, who is visiting Escanaba from New Jersey, shot a hole-in-one at the Escanaba Country Club yesterday afternoon. Savastano was using a seven-iron when he plunked the ball in the 120-yard seventh hole. This was the first in his golfing career. His partners in the round were Wendel Green, Jim Hirn and Tobey Ouimette.

The decay of crofting, an unusual system of tenant farming in northern Scotland, is emptying thatched cottages and driving young people to cities.
